## ***Acknowledgments***

I would first like to thank my wife Denise for her patience and encouragement. I am extremely blessed to have been privileged with her as a gift from above and the one who has been my continual companion and confidant. She has always supported me in this endeavor and allowed me the space and time for research and writing. Without her devotion and inspiration this work would never have come to fruition.

I am also grateful to Dr. Larry S. Hirsch. Without his initial introduction into Hebrew thought and language and his instruction in Biblical studies I would never have started this journey into the Ancient Hebrew thought, culture and language.

Also my friend Michael Calpino who continually supported my studies in the Hebrew language, listened to my discoveries and assisted me by working out many word and root origins and meanings.

I would also like to thank the hundreds of people who have supported my work at the Ancient Hebrew Research Center Website with their suggestions, corrections and encouragement.

There are also many great Hebrew scholars who, with their research and work, have laid the foundations for me and others interested in the Hebrew culture and language who are much deserving of our thanks.

## ***Introduction***

### ***Purpose of the Lexicon***

In order to demonstrate the need for an Ancient Hebrew lexicon let us examine the word הלל (halel), how it is written and what it means.

#### **The written word**

The Hebrew word הלל, as it appears here, in Hebrew dictionaries and in Hebrew Bibles, is written with the Modern Hebrew script. But where did the Modern Hebrew script come from? Hebrew was originally written with a pictographic script similar to Egyptian Hieroglyphs but, when Israel was taken into captivity in Babylon they adopted the Aramaic script of the region and used it to write Hebrew. The Modern Hebrew script used today is in fact Aramaic in origin, not Hebrew.

#### **The word meaning**

According to Hebrew dictionaries and lexicons the word הלל is translated as "praise". The Ancient Hebrew language is a concrete oriented language meaning that the meaning of Hebrew words are rooted in something that can be sensed by the five senses such as a tree which can be seen, sweet which can be tasted and noise which can be heard. Abstract concepts such as "praise" have no foundation in the concrete and are a product of ancient Greek philosophy.

#### **Where is the Hebrew?**

If the word הלל is written with the Aramaic script and the definition "praise" is from the Greek, where is the Hebrew in this word? The purpose of the "*Ancient Hebrew Lexicon of the Bible*" is to restore the original Hebrew to the Hebrew language of the Bible.

#### **The original Hebrew**

The word הלל would have been written as 𐤅𐤋𐤋 in the Early Hebrew script (over 3200 years ago) or as 𐤅𐤋𐤅 in the Middle Hebrew script (between 3200 and 2500 years ago). The original pictographic letters of the parent root 𐤅 is a man with his arms raised "looking" at something spectacular and a shepherd staff that is used to move the flock

## The Ancient Hebrew Lexicon of the Bible

"toward" a place. When these are combined the idea of "looking toward" something is represented. The original meaning of **נָחַם** is the North Star, a bright light in the night sky that is "looked toward" to guide one on the journey.

If we are going to read the Bible correctly it must be through the perspective of the Ancient Hebrews who wrote it, not from a Modern Aramaic or Greek perspective. The word **נָחַם** in its original concrete meaning is a bright light that guides the journey and we "praise" Yah by looking at him to guide us on our journey through life.

### ***Perspective of the Lexicon***

The first and foremost concept that a reader of the Biblical text must learn is that the ancient Hebrews were products of an eastern culture while you as the reader are the product of a western culture. These two cultures are as different as oil and vinegar, they do not mix very well. What may seem rational in our western minds would be considered irrational to an easterner of an ancient Near East culture. The same is true in the reverse, what may be rational to an ancient Easterner would be completely irrational in our western mind.

The authors of the Biblical text are writing from within their culture to those of the same culture. In order to fully understand the text one needs to understand the culture and thought processes of the Hebrew people.

All existing Hebrew Lexicons of the Bible convert the vocabulary of the ancient Hebrews into a vocabulary compatible to our modern western language. The greatest problem with this is that it promotes western thought when reading the Biblical text. In this Lexicon the mind of the reader is transformed into an eastern one in order to understand the text through the eyes of the ancient Hebrews who penned the words of the Bible.

One of the greatest differences between this lexicon and others is the use of the ancient pictographic script which Hebrew was originally written in. Because the Ancient Hebrew language is based on these pictographs, they are used rather than the Modern Hebrew script.

## **Website**

The *Ancient Hebrew Lexicon of the Bible* has its own website with additional material and information such as verb charts, listing of Biblical Hebrew words in order of their frequency, common Hebrew roots and updates to the lexicon and much more. The author is also available for questions, comments and requests.

## ***Ancient Hebrew Thought***

The definition of a word is going to be directly related to the culture in which that word is being used. One word may have different meanings depending on the culture that is using it. In order to place the correct context to a Hebrew word from the Ancient Hebrew language one must first understand Ancient Hebrew thought.

### ***Abstract and Concrete***

Greek thought views the world through the mind (abstract thought). Ancient Hebrew thought views the world through the senses (concrete thought).

Concrete thought is the expression of concepts and ideas in ways that can be seen, touched, smelled, tasted or heard. All five of the senses are used when speaking, hearing, writing and reading the Hebrew language. An example of this can be found in Psalms 1:3; “He is like a *tree* planted by *streams of water*, which yields its *fruit* in season, and whose *leaf* does not *wither*”. In this passage the author expresses his thoughts in concrete terms such as; tree, streams of water, fruit and leaf.

Abstract thought is the expression of concepts and ideas in ways that cannot be seen, touched, smelled, tasted or heard. Examples of Abstract thought can be found in Psalms 103:8; “The LORD is *compassionate* and *gracious*, Slow to *anger*, abounding in *love*”. The words compassion, grace, anger and love are all abstract words, ideas that cannot be experienced by the senses. Why do we find these abstract words in a passage of concrete thinking Hebrews? Actually, these are abstract English words used to translate the original Hebrew concrete words. The translators often translate this way because the original Hebrew makes no sense when literally translated into English.

Let us take one of the above abstract words to demonstrate the translation from a concrete Hebrew word to an abstract English word. Anger, an abstract word, is actually the Hebrew word  (aph) which literally means “nose”, a concrete word. When one is very angry, he begins to breathe hard and the nostrils begin to flare. A Hebrew sees anger as “the flaring of the nose (nostrils)”. If the translator literally translated the above passage “slow to nose”, the English reader would not understand.

## ***Appearance and Functional Descriptions***

Greek thought describes objects in relation to its appearance. Hebrew thought describes objects in relation to its function.

A Greek description of a common pencil would be; "it is yellow and about eight inches long". A Hebrew description of the pencil would be related to its function such as "I write words with it". Notice that the Hebrew description uses the verb "write" while the Greek description uses the adjectives "yellow" and "long". Because of Hebrew's form of functional descriptions, verbs are used much more frequently than adjectives.

To our Greek way of thinking a deer and an oak are two very different objects and we would never describe them in the same way. The Hebrew word for both of these objects is אֵיל (ayil) because the functional description of these two objects are identical to the Ancient Hebrews, therefore, the same Hebrew word is used for both.

The Hebraic definition of אֵיל is "a strong leader". A deer stag is one of the most powerful animals of the forest and is seen as "a strong leader" among the other animals of the forest. The wood of the oak tree is very hard compared to other trees and is seen as a "strong leader" among the trees of the forest.

Notice the two different translations of the Hebrew word אֵיל in Psalms 29:9. The NASB and KJV translates it as "*The voice of the LORD makes the deer to calve*" while the NIV translates it as "*The voice of the LORD twists the oaks*". The literal translation of this verse in Hebrew thought would be; "*The voice of the LORD makes the strong leaders turn*".

When translating the Hebrew into English, the Greek thinking translator will give a Greek description to this word for the Greek thinking reader, which is why we have two different ways of translating this verse. This same word "ayil" is also translated as a "ruler" (a strong leader of men) in 2 Kings 24.15.

Ancient Hebrew will use different Hebrew words for the same thing depending upon its function at the time. For example an ox may be identified as an אֵלֶף (aluph) when referring to a lead ox, a שׁוֹר (shor) when referring to a plow ox, בָּקָר (baqar) when referring to an ox of the field or פָּר (par) when referring to an ox of the threshing floor.

## ***Static and Dynamic***

In our Modern western language verbs express action (dynamic) while nouns express inanimate (static) objects. In Hebrew all things are in motion (dynamic) including verbs and nouns. In Hebrew sentences the verbs identify the action of an object while nouns identify an object of action. The verb מלך (malak) is "the reign of the king" while the noun מלך (melek) is the "the king who reigns". A mountain top is not a static object but the "head lifting up out of the hill". A good example of action in what appears to be a static passage is the command to "have no other gods before me" (Exodus 20:3). In Hebrew thought this passage is saying "not to bring another one of power in front of my face".

# ***The Ancient Hebrew Alphabet***

## ***Evolution of the Hebrew Alphabet***

The Hebrew alphabet was written with a script belonging to the Semitic family of languages. The Semitic script followed three basic stages of development, Early, Middle and Late.

The Early Semitic script was pictographic (fig. 1) where each letter represented an object. In figure 1, the top left corner letter is a picture of water representing the sound “M”. The second letter from right at the bottom is a picture of a shepherd staff representing the sound “L”.

The Middle Semitic script (fig. 2) is an evolved form of the original pictographic script into a simpler form and used by the different Semitic groups including the Hebrews (fig. 2), Moabites (fig. 3), Ammonites (fig. 4), Arameans (fig. 5) and others.

The Aramaic script of the Arameans in Babylon evolved into the Late Semitic script independently from other Semitic scripts (fig. 6). When the Hebrew people were taken into Babylonian captivity, they adopted the Aramaic script (fig. 7) and is still in use today (fig. 8).

While the majority of the Hebrew texts of the first century BCE and into the first century CE were written in the Late Semitic or Aramaic script, the Middle Semitic script was not lost. It was still used on occasion such as on many of the Jewish coins as well as some religious scrolls such as those found in the Dead Sea caves (fig. 9).

The Samaritans lived in the land of Samaria, a region of Israel, at the time of Israel's captivity; they were not taken into Babylon with Israel. As a result of their isolation they are the only culture to retain a script (fig. 13) similar to the Middle Semitic script and is still used to this day in the Samaritan community.

Around 1000 BCE, the Greeks adopted the Middle Semitic script (fig. 11) and began to evolve independently over the centuries to become the Greek script (fig. 12) used today.

## The Ayin and Ghah

While the Modern Hebrew alphabet consists of twenty-two letters, the evidence suggests that there were additional letters in the original Semitic and Hebrew alphabet. One of the ancient Semitic languages of Canaan was Ugarit. This ancient language is almost identical to the Hebrew language of the Bible but, instead of consisting of twenty-two letters it has twenty-eight letters. One of the major differences between Ugarit and Hebrew is the additional letter "ghah". Evidence, such as will be presented here, suggest that the letter "ghah" exists within the Hebrew text of the Bible.

### One Word - Two Meanings

The strongest evidence of the missing ghah can be found in two different meanings of one Hebrew word. The Hebrew word ra' (רע in modern Hebrew) can mean "friend" or "bad". The examples in the table below (Table 1) list several of these double meaning words that contain the letter ע (ayin). The first column is the word as it appears in the modern Hebrew Bible. The second column is the word spelled with the ancient Hebrew letter ע (ayin) and its meaning. The third column is the word spelled with the ancient Hebrew letter ג (ghah) and its meaning.

Table 1

| Modern | Ancient<br>with ayin |     | Ancient<br>with ghah |     |
|--------|----------------------|-----|----------------------|-----|
| יעל    | infant               | על  | wicked               | על  |
| ענח    | profit               | ענח | goat                 | ענח |
| עוף    | heed                 | עוף | answer               | עוף |
| עור    | weary                | עור | darkness             | עור |
| עיר    | skin                 | עיר | blind                | עיר |
| רע     | colt                 | רע  | city                 | רע  |
| רעה    | friend               | רעה | bad                  | רעה |
| שער    | shepherd             | שער | break                | שער |
| ערב    | hair                 | ערב | storm                | ערב |
| ערם    | weave                | ערם | dark                 | ערם |
| ערך    | naked                | ערך | crafty               | ערך |
| יעל    | neck                 | יעל | rain                 | יעל |

## Greek Transliterations of the Ghah

Additional evidence to the existence of the letter ghah is the Greek transliteration of Hebrew names. When the Hebrew Bible was translated into Greek about 2,000 years ago, the translator transliterated the Hebrew names into Greek.

When we examine Hebrew names that contain the Hebrew letter ayin (ע), we find two different methods of transliterating the letter. Table 2 below contains Hebrew names where the ayin is not transliterated because it is a silent letter, while Table 3 contains Hebrew names where the ayin is transliterated with the Greek letter “Gamma” (Γ or γ).

**Table 2**

| Hebrew      |               | Greek   |               | English   |
|-------------|---------------|---------|---------------|-----------|
| Written     | Pronunciation | Written | Pronunciation |           |
| בַּל        | ba'al         | Βααλ    | Baal          | Baal      |

## Impact on Ancient Hebrew Studies

In the study of the ancient Hebrew language and alphabet we begin studying the language at its simplest roots, the letters. Each letter is a picture that represents a meaning. When the letters are combined to form roots, each letter supplies meaning to the root. By then studying the various words, which are derived out of any given root, we can begin to reconstruct the original root language of Hebrew. In order to be as accurate as possible, we need to be sure that we are using the correct words, roots and letters.

When we compare the meanings of the parent roots that were originally spelled with the letter ghah we notice the similarity in meaning with each of these words. The majority of these words are related to darkness (dark, storm, clouds, rain, blind) and wickedness (wicked, goat, city, bad, crafty).

## ***The Samech, Shin and Sin***

In the Modern Hebrew alphabet the letter shin (ש) represents two different sounds, an "sh" and an "s". To differentiate these two sounds a dot is placed above the shin in different locations. For the "sh" sound the dot is placed on the right (שׁ) and called a "shin" and for the "s" sound it is placed on the left (שׂ) and called a "sin".

In most cases words spelled with the sin are more closely related in meaning with words spelled with the samech (ס). In addition, Hebrew words spelled with the sin are written with the samech in other Semitic languages. In the Hebrew Bible several Hebrew words written with the ש are also written with a ס. Table 4 below are some examples.

**Table 4**

|    |   |     |        |            |
|----|---|-----|--------|------------|
| א  | נ | נסא | nasa   | Lift up    |
| ור |   | סור | sur    | Remove     |
| כך |   | סכך | sakak  | Cover      |
| וט |   | סוט | sut    | Turn aside |
| ט  |   | סט  | set    | Rebel      |
| ה  | ש | שסה | shasah | Plunder    |

Because the *Ancient Hebrew Lexicon of the Bible* is concerned with restoring Hebrew words to their original meaning and relationship with the ancient roots, words written with a ש in the Masoretic text will be written with the ancient pictograph ש (sin/samech) in the Lexicon. For example, the word שסה appears as שסה in the Lexicon with the spelling שסה noted under "defective spellings".

## ***Reconstruction of the original Hebrew Alphabet***

The Ancient Hebrew letters form the foundation to the Ancient Hebrew language and a thorough study of these letters is essential to understanding the cultural background to the words they form. The process of reconstructing the original Hebrew alphabet is similar to the field of archeology, which digs down to hidden depths to determine the origins, culture or way of life of Ancient civilizations. As artifacts are found, they are

compared to artifacts of other cultures and other time periods to determine the distinctive characteristics of the culture and civilization. When studying Ancient alphabets, one digs down into the depths of time and compares the artifacts of pictographic and non-pictographic scripts to determine dates, meaning and sound.

### Letter Characteristics

We usually associate two characteristics for each letter, a form and a sound, as in the first letter of our alphabet whose form is "A" and has the sound "a". The Ancient Hebrew alphabet has four characteristics: form, sound, name and meaning.

#### Form

The original letter is pictographic, meaning it represents a picture of something, such as the letter  representing a mouth. The original form is determined by examining the archeological record of ancient Semitic inscriptions and other related scripts such as the South Arabian and Punic. The name of the letter will help to determine the original pictograph.

#### Name

Each pictograph is associated with a single syllable of two consonants. This syllable is also the name of the letter. The name of the letter  is "peh" and is also the Hebrew word for "mouth". The name is determined by comparing the various names of this letter as used in Semitic languages as well as other non Semitic languages that have adopted the Semitic alphabet.

#### Meaning

The mnemonic meaning of a pictograph is the extended meanings related to the pictograph. These mnemonic meanings most often are related to the pictograph by their function rather than appearance. For example, the letter  has the extended mnemonic meanings, speak, blow and open, functions of the mouth.

#### Sound

The first letter of the syllabic name provides a singular sound for the purpose of forming words and sentences. The phonetic value of the letter  is therefore a "p". The original sound is determined by comparing the sound of the letter as used in other Semitic languages as well as non-Semitic languages that have adopted the Semitic alphabet.

## ***The Reconstructed Alphabet***

### ***Al***

The original pictograph for this letter is a picture of an ox head -  representing strength and power from the work performed by the animal. This pictograph also represents a chief or other leader. When two oxen are yoked together for pulling a wagon or plow, one is the older and more experienced one who leads the other. Within the clan, tribe or family the chief or father is seen as the elder who is yoked to the others as the leader and teacher.

The Modern name for this letter is aleph () and corresponds to the Greek name alpha and the Arabic name aleph. The various meanings of this root are oxen, yoke and learn. Each of these meanings is related to the meanings of the pictograph . The root  is an adopted root from the parent root  (AL) meaning, strength, power and chief and is the probable original name of the pictograph .

The  is a shepherd staff and represents authority as well as a yoke (see Lam below). Combined these two pictographs mean “strong authority”. The chief or father is the “strong authority”. The  can also be understood as the “ox in the yoke”. Many Near Eastern cultures worshipped the god  / AL, most commonly pronounced as “el” and depicted as a bull in carvings and statues. Israel chose the form of a calf (young bull) as an image of God at Mount Sinai showing their association between the word  and the ox or bull. The word  is also commonly used in the Hebrew Bible for God or any god.

The concept of the ox and the shepherd staff in the word  has been carried over into modern times as the scepter and crown of a monarch, the leader of a nation. These modern items are representative of the shepherd staff, an ancient sign of authority, and the horns of the ox, an ancient sign of strength.

In Modern Hebrew this letter is silent but was originally used as the vowel “a” as well as a glottal stop. The Greek letter “alpha” derived from the “aleph” is also used for the “a” sound.

The Early Semitic pictograph  was simplified to  and  in the Middle Hebrew script and continued to evolve into the  in the Late Hebrew script. The Modern

Hebrew letter א developed out of the Late Semitic. The Middle Semitic was adopted by the Greeks to be the letter “A” and carried over into the Roman “A”. The Middle Semitic script א became the number “1” we use today.

## **Bet**

Several variations were used for the original pictograph including, , ,  and . Each of these pictographs are representative of a house or tent. The pictograph  is chosen as it best represents the nomadic tents of the Hebrews. The tent was divided into two sections, men's and women's, with the entrance at the front of the tent in the men's section and an entrance from the men's to the women's section.

The Hebrew word (bet) means house or tent as well as family. A common designation for a family is to identify the “house” of the family patriarch such as in “The house of Jacob”.

The meanings of this letter are house, tent, family as well as in, with, inside or within as the family resides within the house or tent.

The original name for this letter is bet, the parent root of the child root beyt (meaning house) and is equivalent to the Greek name beta and the Arabic name beyt. This letter is pronounced as a “b” when sounded as a stop such as in the word “beyt” or a “bh” (v) when sounded as a spirant as in the word “shubh” (shoov).

This letter is commonly used as a prefix to words to mean “in” or “with” as in “be’erets” meaning “in a land”.

The Early Semitic letter  evolved into  in the Middle Semitic script and into  in the Late Semitic script. The Modern Hebrew letter  developed out of the Late Semitic. The Middle Semitic script was adopted by the Greeks to become the letter β (a reverse direction due to being written from right to left instead of left to right) and the Roman B and b. The Late Semitic script  became the number “2”.

## **Gam**

The earliest known pictograph for this letter is  and is a picture of a foot. The Modern Hebrew name for this letter is “gimel”, an adopted root. The original name to this letter is most likely “gam”, the parent root of “gimel”. This letter is the origin of the Arabic letter “Geem” and the Greek “gamma” supporting the theory that the original name for the letter did not include the “L”.

The word “gam” means to gather together as a group of animals gathering at the water hole to drink. The pictographic script for the word “gam” is . The  is the foot representing “walk” and the  is “water” (See Mah below). Combined these mean “walk to the water”.

The letter  has the meanings of walk, carry or gather. The sound associated with this letter is a “g” as in “go”.

The Early Semitic  became  and  (a turn of 180 degrees) in the Middle Semitic script. This letter further developed to  in the Late Semitic script. The Late Semitic script further developed into the Modern Hebrew . The Middle Semitic script became the Greek Γ (a reversal of the letter due to direction of writing) as well as the Roman C and G. The Late Semitic  became the number 3.

## **Dal**

There are two possibilities for the original Early Semitic pictograph for this letter - , a picture of a fish and  a picture of a door. The modern Hebrew name for this letter is “dalet” and means “door”. The word “dalet” is a derivative of the parent root “dal” also meaning “door”. The Arabic name for this letter is “dal” giving support to the parent root as the original name. As the Hebrew word for a “fish” is dag, it is unlikely that the pictograph  is the pictograph for this letter but, rather the pictograph .

The basic meaning of the letter  is “door” but has several other meanings associated with it. It can mean “a back and forth movement” as one goes back and forth through the tent through the door. It can mean “dangle” as the tent door dangled down from a roof pole of the tent. It can also mean weak or poor as one who dangles the head down.

The sound for this letter is a “d” as in “door” as it is with the Greek and Arabic equivalents.

## The Ancient Hebrew Lexicon of the Bible

The Early Semitic pictograph  evolved into the Middle Semitic letter **𐤅**. The Middle Semitic then evolved into the Late Semitic letter **ה**, the early form of the Modern Hebrew **ה**. The Middle Semitic letter is the origin of the Greek letter Δ, The Roman D and the number 4.

### **Hey**

The original pictograph for this letter is  or , a man standing with his arms raised out. The Modern Hebrew and original name for this letter is “hey”. The Hebrew word “hey” means “behold”, as when looking at a great sight. This word can also mean “breath” or “sigh” as one does when looking at a great sight. The meaning of the letter  is behold, look, breath, sigh and reveal or revelation from the idea of revealing a great sight by pointing it out.

The Modern Hebrew sound for this letter is “h”. Originally this letter doubled as a consonant, with an “h” sound, or as the vowel sound “eh”. When the Greeks adopted this letter it became the “epsilon” with an “eh” sound.

This letter is commonly used as a prefix to words to mean “the” as in “ha’arets” meaning “the land”. The use of this prefix is to reveal something of importance within the sentence.

The Early Semitic  evolved into the Middle Semitic **𐤅** by rotating the letter 90 degrees to the left. This letter then evolved into **𐤆** in the late Semitic script that developed into the Modern Hebrew **ה**. The Middle Semitic **𐤅** was adopted by the Greeks and the Romans to become the E (reversed due to the direction of writing). This Middle Semitic letter also became the number 5.

### **Waw**

The original pictograph used in the Early Semitic script is a **𐤆**, a picture of a tent peg. The tent pegs were made of wood and may have been Y-shaped to prevent the rope from slipping off.

The Modern Hebrew name for this letter is “vav”, a word meaning “peg” or “hook”. This letter is used in Modern Hebrew as a consonant with a “v” sound and as a vowel.

## The Ancient Hebrew Lexicon of the Bible

If the Modern Hebrew letter appears as ו, it is the vowel sound “ow” and if it appears as װ, it is the vowel sound “uw”. When used as a vowel the ancient pronunciation was also an “ow” or “uw”. In each of the consonant/vowel letters of the Ancient Hebrew language the pronunciation of the **consonant** is closely related to the pronunciation of the vowel such as the letter “hey” (See above) is “h” and “eh” and the pronunciation of the letter “yud” (See below) is “y” and “iy”. For this reason, it is probable that the original pronunciation of the letter װ was with a “w”. In Modern Arabic language, this letter is also pronounced with a “w”. Therefore, the original name of this letter would have been “waw” instead of “vav”.

As the pictograph indicates, this letter represents a peg or hook, which are used for securing something. The meaning of this letter is to add or secure.

This letter is frequently used as a prefix to words to mean “and” in the sense of adding things together.

The Early Semitic װ evolved into the 𐤆 in the Middle Semitic script. This letter then became the 𐤅 of the Late Semitic script and evolved into the Modern Hebrew ו. The Middle Semitic letter was adopted by the Greeks and the Romans to be the letter F but was dropped from the Greek alphabet later. The Late Semitic form of the letter became the number 9.

## Zan

The ancient pictograph for this letter is 𐤆 and is some type of agricultural implement similar to a mattock or plow. The meanings of this letter are “harvest” or “crop” as this tool is used in the harvesting, “food” as from the harvest, “cut” from the function of the implement and “broad” from its shape.

The Modern Hebrew name for this letter is “zayin” but was originally the parent root “zan”. When the Greeks adopted the letter its name was originally “zan” but later became “zeta”, the modern name for this letter in the Greek alphabet.

The phonetic sound for this letter is a “z” as it is in Greek and Arabic.

The Early Semitic pictograph was simplified to 𐤆 and evolving into 𐤆 in the Late Semitic script and evolved into the Modern Hebrew letter ז. The Greeks and Romans adopted this letter to become the letter “Z”. The Late Semitic 𐤆 became the number 7.

## ***Hhets***

The ancient pictograph  is a picture of a tent wall. The meanings of this letter are outside as the function of the wall is to protect the occupants from the elements, help as the wall in the middle of the tent divides the tent into the male and female sections and secular as something that is outside.

The Modern Hebrew name for this letter is *hhet* meaning a string. A very similar word Hebrew word *hhets* is a wall and is most likely the original name for this letter. The sound of the letter, in ancient and modern times, is a guttural "hh" (as in the "ch" in the name Bach).

The early Semitic pictograph  evolved into  in the Middle Semitic script by being rotated 90 degrees. This letter continued to evolve into  in the Late Semitic script. The Middle Semitic script is the origin of the Greek and Roman H while the late Semitic script became the modern Hebrew . The Middle Semitic form of this letter became the number 8.

## ***Thet***

The original pictograph for this letter is , a container made of wicker or clay. Containers were a very important item among the nomadic Hebrews. They were used for storing grains and other items. Wicker baskets were used as nets for catching fish. The meanings of this letter are basket, contain, store and clay.

The twenty-second letter of the Hebrew alphabet is a tav with a "t" sound. It is unlikely that the original Hebrew had two letters with the same sound. When the Greeks adopted the Hebrew alphabet this letter the Greek theta. The original sound for this letter is was probably a "th".

The Modern Hebrew name for this letter is "tet" meaning mud or clay but would have been pronounced as "thet".

The Early Semitic letter  remained unchanged into the Middle Semitic script but was simplified to  in the Late Semitic script. The Late Semitic letter became the , Theta, in the Greek alphabet, the Modern Hebrew  and our number 6.

## **Yad**

The Early Semitic pictograph of this letter is , an arm and hand. The meaning of this letter is work, make and throw, the functions of the hand. The Modern Hebrew name “yud” is a derivative of the two letter word “yad” meaning "hand", the original name for the letter.

The ancient and modern pronunciation of this letter is a "y". In Ancient Hebrew this letter also doubled as a vowel with an “i” sound. The Greek language adopted this letter as the “iota”, carrying over the “i” sound.

The ancient pictograph , was turned 90 degrees to become the  in the Middle Semitic script. The letter continued to evolve into the simpler form  in the Late Semitic script. The Middle Semitic form became the Greek and Roman I. The Late Semitic form became the Modern Hebrew י.

## **Kaph**

The Ancient form of this letter is  the open palm of a hand. The meanings of this letter are bend and curve from the shape of the palm as well as to tame or subdue as one who has been bent to another's will.

The Modern Hebrew name for this letter is kaph, a Hebrew word meaning “palm” and is the original name for the letter. This letter is pronounced as a “k”, as in the word “kaph”, when used as a stop or as a “kh” (pronounced hard like the German name Bach), as in the word “yalakh” (to walk) when used as a spirant.

The Early Semitic  evolved into  in the Middle Semitic script. This letter continued to evolve into  in the Late Semitic script and becoming the Modern Hebrew כ and the ך (final kaph). The Middle Semitic  became the Greek and Roman K (written in reverse direction).

## **Lam**

The Early Hebrew pictograph is , a shepherd's staff. The shepherd staff was used to direct sheep by pushing or pulling them. It was also used as a weapon against predators to defend and protect the sheep.

The meaning of this letter is toward as moving something in a different direction. This letter also means authority, as it is a sign of the shepherd, the leader of the flock. It also means yoke, a staff on the shoulders as well as tie or bind from the yoke that is bound to the animal.

This letter is used as a prefix to nouns meaning “to” or “toward”.

The Modern Hebrew name of this letter is “lamed”, similarly is the Greek name “lamda”. The Arabic name however is “lam” retaining an older two letter root name for the letter and the probable original name. The phonetic sound for this letter is “l”.

The original pictograph for this letter, , has remained virtually unchanged through the ages. The Middle Semitic remained the same but changed slightly to  in the Late Semitic script becoming the  in the Modern Hebrew script. The Early Semitic  is the origin of the Greek Λ (upside down) and the Roman L.

## **Mah**

The Early Semitic pictograph for this letter is  a picture of waves of water. This pictograph has the meanings of liquid, water and sea, mighty and massive from the size of the sea and chaos from the storms of the sea. To the Hebrews the sea was a feared and unknown place, for this reason this letter is used as a question word, who, what, when, where, why and how, in the sense of searching for an unknown.

The modern Hebrew name for this letter is “mem” probably from the word “mayim” meaning “water”. The word “mayim” is the plural form of “mah”, probably the original name for this letter, meaning “what”. The Greek name for this letter is “mu”, a Hebrew word closely related to “mah”. The sound for this letter is “m”.

The Early Semitic  evolved into  in the Middle Semitic and continued to evolve into  in the Late Semitic script. The Late Semitic script became the  and  (final mem) of the Modern Hebrew script. The Early and Middle Semitic script is the origin to the Greek and Roman M.

## Nun

The ancient pictograph נ is a picture of a seed sprout representing the idea of continuing to a new generation. This pictograph has the meanings of continue, perpetuation, offspring or heir.

The Modern Hebrew name is “nun”, a Hebrew word meaning continue, offspring or heir. This two-letter word is the original name for the letter. The phonetic sound for this letter is “n”.

The Early Semitic נ evolved into נ in the Middle Semitic script and continued to evolve into נ in the Late Semitic script. The Late Semitic script became the Modern Hebrew נ and נ (final nun). The Middle Semitic script became the N (written in reverse direction) in both the Greek and Roman alphabets.

## Sin

There are several possibilities for the original Semitic pictograph including נ (a fish), נ (possibly a thorn), נ (a window?) and נ (a thorn). The pictograph נ is used almost exclusively through the history of this letter. This picture has the meanings of pierce and sharp. This letter also has the meaning of a shield as thorn bushes were used by the shepherd to build a wall or shield, made to enclose his flock during the night to protect them from predators. Another meaning is to grab hold as a thorn is a seed that clings to hair and clothing.

Of all the letters this is the most difficult to reconstruct due to the limited archeological and textual support. The Modern Hebrew name for this letter is samech (סמך), which is a word that means support, with no apparent connection to a two letter parent root or to the meaning of the original picture of this letter. The Arabic alphabet does not have this letter and the Greek letter derived from this letter is called the ksi. The 21st letter of the Hebrew alphabet (ש) has two names and sounds, Shin (sh) and Sin (s). All the words using the sin are related in meaning to the words using a samech in the same place as the sin. It is possible that the original name for the samech was sin, meaning thorn, and later was divided into the samech and sin (which then became associated with the shin).

The original sound for this letter must be an "s" to which the samech and sin both agree. The Greek sound for the letter is "ks", similar to the "s".

The early Semitic  evolved into the  in the middle Semitic. This letter continued to evolve into  in the late Semitic. This letter became the  in the modern Hebrew alphabet. The late Semitic is reversed in the Greek alphabet becoming the ξ and Ξ. The Greek letter Ξ became the Latin X.

## **Ayin**

The Ancient picture for this letter is a picture of an eye . This letter represents the ideas of seeing and watching as well as knowledge as the eye is the window of knowledge.

The name of the letter is ayin, a Semitic word meaning eye. This letter is silent in modern Hebrew. There is no indication that the ancient Semitic had a sound for this letter as well and appears to have been silent in the past. The Greek language assigned the vowel sound "o" to the letter. As Hebrew did not have one letter for the "o" sound the Greeks took this silent letter and converted it into a vowel.

The early Semitic  evolved into the simpler  in the middle Semitic and remained the same into the late Semitic period. This letter evolved into the  in the modern Hebrew script. The middle Semitic became the Greek O and the Latin O.

## **Pey**

The Semitic word "pey" means a "mouth" and there are several ancient Semitic pictographs believed to be this letter, none of which resemble a mouth. The only exception is the South Arabian pictograph . This pictograph closely resembles a mouth and is similar to the later Semitic letters for the letter "pey".

This pictograph has the meanings of speak and blow from the functions of the mouth as well as the edge of something, as the lips are at the edge of the mouth.

The modern Hebrew name for this letter is "pey" and as previously identified it is the Hebrew word for mouth. There are two sounds for this letter, the stop "P" and the spirant "Ph" or "f".

The early Semitic  evolved to the letter **1** in the middle Semitic scripts. The letter continued to evolved into the **2** in the late Semitic script. This letter evolved into the **3** and **4** (final pey) in the modern Hebrew script. The middle Semitic **1** became the Greek **Π** and the Latin **P**.

## ***Tsad***

The three Ancient pictograph possibilities for this letter are ,  and . The word "tsad" means "side" as a man lying on his side and may be the meaning of the last two pictographs. Most ancient Semitic alphabets used pictographs which closely resemble the last pictograph indicating that this was most likely the original form of the letter.

The meaning of this letter is the side of something as well as hunting and chasing through the idea of laying down in ambush. The modern name for this letter is tsade, a child root from the word tsad also meaning side. The phonetic sound of the letter is a "ts" in both ancient and modern Hebrew.

The early pictograph  evolved into  in the Middle Semitic script and continued to evolve into  in the Late Semitic Script. From the middle Semitic script comes the Modern Hebrew  and . Modern Greek and Latin has no letter derived from this Semitic letter.

## ***Quph***

Most of the pictographs used for this letter are  or . Ancient Semitic letter which were originally oriented in a horizontal plane were tilted to a vertical plane. More than likely this letter was originally written as .

The name of this letter is quph, a parent root. When all of the words derived from this parent root are compared the common theme of a circle or revolution are found. The pictograph of this letter is probably a picture of the sun at the horizon in the sense of a revolution of the sun.

The various meanings of this letter are sun, revolution, circle and horizon. This letter can also mean condense as the light gathers at the sun when it is at the horizon. It can also mean time as the revolution of the sun is used to calculate time. Hebrew, Greek

## The Ancient Hebrew Lexicon of the Bible

and Arabic agree that the sound for this letter is "q". The Modern Hebrew and Arabic name for this letter is quph, a parent root.

The early pictograph  evolved into  in the Middle Semitic script and continued to evolve into  in the Late Semitic Script. From the middle Semitic script comes the Modern Hebrew ק. The Middle Semitic script is the origin of the Latin letter Q.

## Resh

The Ancient picture for this letter is , the head of a man. This letter has the meanings of head or man as well as chief, top, beginning or first.

The modern Hebrew name for this letter is resh, a Hebrew word meaning head. Hebrew, Aramaic and Greek agree that the sound for this letter is an "r".

The early pictograph  evolved into  in the Middle Semitic script and continued to evolve into  in the Late Semitic Script. From the middle Semitic script comes the Modern Hebrew ר. The Middle Semitic script is also the origin of the Greek letter P and the Latin R.

## Shin

The Ancient picture for this letter is , a picture of the two front teeth. This letter has the meanings of teeth, sharp and press (from the function of the teeth when chewing). It also has the meaning of two, again, both or second from the two teeth.

The modern Hebrew name for this letter is shin, a Hebrew word meaning tooth. Hebrew and Arabic agree that the sound for this letter is "sh".

The early pictograph  evolved into  in the Middle Semitic script and continued to evolve into  in the Late Semitic Script. From the middle Semitic script comes the Modern Hebrew ש. The Middle Semitic script is also the origin of the Greek letter Σ and the Latin S.

## **Taw**

The Ancient picture † is a type of "mark", probably of two sticks crossed to mark a place similar to the Egyptian hieroglyph of , a picture of two crossed sticks. This letter has the meanings of mark, sign or signature.

The Modern Hebrew, Arabic and Greek names for this letter is tav (or taw), a Hebrew word meaning, mark. Hebrew, Greek and Arabic agree that the sound for this letter is "t".

The early pictograph † evolved into † in the Middle Semitic script and continued to evolve into † in the Late Semitic Script. From the middle Semitic script comes the Modern Hebrew ט. The Early Semitic script is the origin of the Greek letter T and the Latin T.

## **Ghah**

While this letter existed in ancient Semitic languages and some modern Semitic languages, it no longer exists in the modern Hebrew. Instead it has been absorbed into the letter א (ayin). While the evidence exists showing that this is in fact a separate letter, there is very little evidence for reconstructing its original pictograph. The Ugarit and Arabic languages wrote this letter the same as the ayin but with an additional line or dot. The closest candidate for this letter is the ṣ, a twisted rope, as found in some ancient Semitic inscriptions.

In the Arabic language this letter is called the ghah but originally may have had the name ghah meaning "twisted". The meaning of the letter ghah is twisted from the twisting fibers of a rope and from this come the meaning of goats from their twisted horns. As goats are dark in color, this letter also carries the meaning of dark.

Because the Greek language transliterates this letter with a gamma (g sound) we know that this letter originally had a type of "g" sound such as in the word ring.

## ***The Hebrew Root System***

### ***Parent Roots***

When two pictographs are put together, a Parent Root word is formed. When the **ב** (B, a house) is combined with the **נ** (N, a seed which continues the next generation) the Parent Root **בן** (pronounced ben) is formed. The two letters of this root have the combined meaning of "the house of seeds" or "the seeds that continue the house/family". This word is translated simply as "son".

These parent roots are often used in the Biblical text as words themselves. While these words are usually specific in nature, their original meaning was very broad. The Hebrew word **בן** means "son", the more original broad meaning of the parent root **בן** is to build (a house or family). This can be seen in the various other derivatives of the Parent Root having the meanings of build, house, bricks and children.

### ***Child Roots***

Formed out of the Parent Roots are thirteen different Child Roots. The first is formed by doubling the last letter of the Parent Root. Hebrew verbs require a three consonant root in order to be conjugated. Therefore, the second consonant in the Parent Root is duplicated to turn the two consonant Parent Root into a three consonant child root. The meaning of this derivative from the Parent Root is usually identical in meaning to the original Parent Root.

The other twelve Child roots are formed by placing a vowel within the Parent Root. Of the twenty-two letters of the Hebrew alphabet, four double as consonants and vowels. These are the **א** (A), **ה** (H, E), **ו** (W, O and U) and **י** (Y, I).

A Child Root is formed by adding one of the consonant/vowels as a prefix (in front), a suffix (at the end) or an infix (in the middle) to the Parent Root. All of the Child Roots formed from the Parent Root are directly related in meaning to the Parent Root. Table 6 below are the Child Roots formed from the Parent Root **בן** (BL), which has the

generic meaning of "flow", demonstrating the close relationship between the Parent and Child roots.

**Table 6**

| Hebrew | Meaning | Connection to root      |
|--------|---------|-------------------------|
| לָחַץ  | Wilt    | Flowing away of life    |
| לָחַץ  | Empty   | Flowing out of contents |
| לָחַץ  | Panic   | Flowing of the insides  |
| לָחַץ  | Aged    | Flowing away of youth   |
| לָחַץ  | Flood   | Heavy flowing of water  |
| לָחַץ  | Steam   | Flowing of water        |

## Adopted Roots

An adopted root is a three letter root that is formed out of a parent root. These roots evolved over time out of the original parent roots. Adopted roots are formed by adding a third consonant to a Parent Root forming a new root that is more specific in meaning than the parent. In Table 7 adopted roots formed out of the parent root **נָחַץ** (with the generic meaning "to break") are listed. Each of the adopted roots have a more precise meaning of "to break".

**Table 7**

| Hebrew | Meaning         |
|--------|-----------------|
| נָחַץ  | Break forth     |
| נָחַץ  | Break apart     |
| נָחַץ  | Break in pieces |
| נָחַץ  | Break off       |
| נָחַץ  | Break open      |

There are also a few four letter adopted roots in the Biblical text, sixty-seven in all. Because of the scarcity of these roots it appears that these roots came into existence at an even later date than the three letter adopted roots of which there are hundreds.

## Reconstruction of Roots

By comparing the various aspects of a parent root, the original meaning of the parent can be determined. For example, the two child roots  (MQQ) meaning "to rot" and  (MQ) meaning "to stink" are formed out of the parent root . These two ideas are connected in that something that rots begins to stink. When we examine the letters which form the parent root,  and , we find the original meaning. The  is a picture of water and the  is a picture of the sun at the horizon representing the gathering or condensing of light. When we combine the meaning of these two letters we have "water condensed". When the water of a pond condenses, such as dries up, the vegetation and fish that lived in that water die and begin to rot and stink. We know have a picture which will help us better understand the meaning of these words. One additional piece to the puzzle is the adopted root  (TsMQ), an adopted root meaning "dry".

Many times the adopted roots alone can help to reconstruct the meaning of a Parent root. The original meaning of the parent root  (BHh) is very difficult to determine as the only word derived from it is the word  (av'hhah) from the child root  (ABHh) meaning "sharp point". The adopted roots in Table 8 clearly show the original meaning of the parent root  as "slaughter" and the "point" is in reference to the knife that is used to slaughter.

## ***The Hebrew Language***

Each root represents an action, an object that reflects the action and an abstract derived from the action of the object. The action is referred to as a verb while the object and abstract are referred to as nouns. The root **שׁוּב** (BRK) is the foundation to the verb **שׁוּב** (barak) meaning "to kneel" (action) and the noun **שׁוּב** (berek) meaning "knee" (object). The noun **שְׁוֹבָה** (berakah) is derived from the root and can be a gift (object) or the abstract concept of a "blessing" in the sense of bringing a gift on bended knee.

### ***Verbs***

Hebrew verbs, like English verbs, describe action. Because the Hebrew language is an action oriented language rather than descriptive, it is prolific with verbs. When a Hebrew verb is conjugated in a sentence it identifies person, number, gender, tense, mood and voice. Understanding these different aspects of a verb is essential for proper interpretation of that verb.

#### **Person**

Each verb identifies the subject of the verb as first (I), second (you) or third (he) person.

#### **Number**

Each verb also indicates the subject of the verb as singular or plural (we, you or they).

#### **Gender**

Each verb also indicates the subject of the verb as masculine (he) or feminine (she).

#### **Tense**

There are four tenses in Hebrew verbs, perfect, imperfect, participle and imperative. In the English language the verb tenses are related to time; past, present and future, while the Hebrew verbs are all related to action. The perfect tense is a completed action and in most cases is related to the English past tense (he cut). The imperfect tense is an incomplete action and is closely related to the English present and future tenses (he cuts or he will cut). The participle can be a current action or one who performs the action (a cutting or cutter). The imperative identifies the action, similar to a command, with no reference to the subject (cut!). When the prefix **ו** (waw) meaning "and" is attached to

## The Ancient Hebrew Lexicon of the Bible

the verb, the verb tense (perfect or imperfect) reverses. For this reason this letter, when used in this context, is called the reversing or consecutive waw.

### Voice

Each verb also includes voice of which there are three; active, passive or reflexive. The active voice identifies the action of the verb as coming from the subject (he cut). The passive voice does not identify the origin of action placed on the subject of the verb (he was cut). The reflexive voice places the action of the verb onto the subject (he cut himself).

### Mood

Each verb also includes mood of which there are three; simple, intensive or causative. The simple mood is simple action of the verb (he cut). The intensive mood implies force or emphasis on the verb (he slashed or hacked). The causative mood expresses causation to the verb (he caused a cut).

The voice and mood of a verb is identified by seven different forms as shown in Table 9.

**Table 9**

| Form    | Mood      | Voice     | Example            |
|---------|-----------|-----------|--------------------|
| Paal*   | Simple    | Active    | He cut             |
| Niphal  | Simple    | Passive   | He was cut         |
| Piel    | Intensive | Active    | He slashed         |
| Pual    | Intensive | Passive   | He was slashed     |
| Hiphil  | Causative | Active    | He made cut        |
| Hophal  | Causative | Passive   | He was made cut    |
| Hitpael | Intensive | Reflexive | He slashed himself |

\* Also called the "qal" form.

### Verb Conjugations

While all of this appears complex and confusing at first it should be noted that the majority of the Hebrew verbs in the Bible are written in the paal form. It should also be noted that of these verbs most of them are written in the perfect tense, third person, masculine, singular, paal form.

## Nouns

The most common noun form is the use of the two or three letter root. From the parent root אב (AB), meaning a tent pole, comes the noun אב (av) meaning "father". As was mentioned previously, all nouns are action oriented and the full understanding of the noun אב is "the one who holds up the tent/house". Just as the tent pole supports the tent, the father supports the family within the tent. The root פתח (PTHh) is the base for the verb פתח (patahh) meaning "to open" and the noun פתח (petahh) meaning a door.

## Noun Derivatives

Additional nouns are also formed out of the base root by adding specific letters as prefixes, infixes and suffixes, in specific places within the root. The noun derivative מפתח (maph'teach) meaning a key is formed by adding the letter מ to the front of the noun פתח (petahh - a door). Some of the most common noun derivatives are formed by placing a מ(m) or ת(t) before the root or a י(i) or ו(o or u) within the root.

## Feminine Derivatives

In Hebrew all nouns are either masculine or feminine. In most cases the nouns and noun derivatives are masculine and are converted into feminine nouns by adding one of four suffixes; ה(ah), ת(et), ו(owt), or ית(iyt). Generally, masculine nouns are concrete while feminine nouns are abstract.

## Combination Derivatives

Additional noun derivatives are formed by combining different prefixes, infixes and suffixes. The four feminine suffixes can also be added to any of the other noun derivatives resulting in a wide variety of possible nouns.

## Plural Nouns

Nouns are made plural by adding the suffix מן or ת. Generally the מן is used for masculine nouns and ת for feminine nouns. In some cases masculine words, usually very ancient words, will use the ת suffix. The Hebrew words אב (av - father) and נר (or - light) are masculine words but are written as אבות and נרות in the plural. In all modern languages the plural is always quantitative while in Ancient Hebrew a plural can be quantitative or qualitative. For instance the word "trees" refers to more than one tree (quantitative) while in Hebrew the plural word עצים (etsiyim - trees) can mean more than one tree (quantitative) or one very large tree (qualitative). An example of this is the word תנינאים (behemot or usually transliterated as behemoth in Job 40:15). This word is the plural form of the singular תנינא (behemah), meaning beast, but refers to a very large beast rather than more than one

beast. One of the most common uses of the qualitative plural is the word  (elohiym) which can be translated as "gods" (quantitative) or as "God" (qualitative).

## Grammatical Tools

Hebrew uses nouns for other functions within the sentence. They can be used as adjectives, adverbs, prepositions, conjunctions, etc. The noun  (eqev) can be the "heel" of the foot but, it can also mean "because" in the sense of being on the heel of the previous phrase. Because the Ancient Hebrew language does not make distinctions between these types of words the Lexicon lists them all as nouns and noun derivatives.

## *Determining the original meaning of Hebrew words*

As it has been mentioned, Hebrew words are commonly defined from a western perspective. How is the original meaning of words from an Hebraic perspective determined? A Hebrew word that is often translated in an abstract manner will many times be used in a concrete manner somewhere in the text (most often in the book of Job, the oldest book of the Bible and therefore using the most ancient meanings of words). An example of this is the word  (hhay). This word is usually translated as life but in one place, Job 38:39, this word is best translated as "stomach"; "Can you hunt the prey of the lion or fill the stomach of the young lion?". From this we see that life to the Ancient Hebrew is related to a full stomach.

By comparing the word in question with other words derived from the same or related roots the original meaning can be determined. The word  (kohen) meaning "priest" is related to other words meaning base, foundation and level. From this we discover that the priests of the community are the foundation or the firm base of that community.

The pictographs also help to determine the original meaning of a word such as the Hebrew word for "mother",  (eym). The  is a picture of an ox representing strength and the  is a picture of water. Combined these mean "strong water" or glue. The mother is understood by the ancient Hebrews as one who binds the family together.

Other devices used is to compare the use of this word with synonyms and antonyms in poetical passages, the context in which the word is used and the use of the word in other Semitic languages.

## Letter Evolution

Over time words and their roots evolve. One of the most common evolutions of a word is an exchange for one sounding letter for another. All spoken sounds can be grouped into seven different categories. Table 10 below lists these categories and the letters that correspond to them.

Table 10

| Category  | Location       | English | Hebrew            |

| Fractives | whistle sounds | csz     | צ ס ז             |
| Vowels    | breath sounds  | aeiou   | א ע י ו           |

This can be seen in many English words such as "vine" which is the origin of "wine" where the "w" is exchanged for the "v". The word "foot" comes from the ancient word "ped" meaning foot (as in pedal or pedestrian). This type of letter exchange occurs frequently in all languages including Hebrew.

Within the Biblical text we have the ancient parent root זב (zav) meaning “yellow”. From this parent root two child roots are derived; זחב (zahav) meaning “gold” and זב (zuv) meaning “puss”, both being yellow in color. Another child root, זחב (tsahav), also has the meaning “yellow” but, has no connection to the ancient parent root זב (tsav) meaning “wall”. From this evidence we can conclude that זחב is an evolved form of the root זב. The letter ח (ts) has replaced the ז (z), both sounds being very similar.

Another common evolution is the replacement of letters. The Hebrew word לב (lev) meaning heart has evolved into the Aramaic word בל (bal), also meaning heart, by reversing the order of the letters.

In the *Ancient Hebrew Lexicon of the Bible* the original spelling of the words will be used. The spelling as found in the Biblical text will be listed under "defective spellings".

## ***Ancient Hebrew Pronunciation***

The following rules will assist the reader with pronouncing the Hebrew words without relying on the nikkud (vowel pointings) as used in most lexicons and dictionaries.

### **Spirants and Stops**

A spirant is a letter whose sound can be prolonged. Some examples of this from the English language are the v, z, f, and sh. A stop is a letter whose sound ends abruptly such as the b, p, d and t. A few of the Hebrew letters will have a different pronunciation depending on their position within the word. The letter **ב** will usually be pronounced as a stop (b) when at the beginning of the word and as a spirant (v) when it is anywhere else in the word. For example the word **בַּר** is pronounced “bar” while the word **רַב** is pronounced “rav”. Another letter that will change is the letter kaph - **כ**. When at the beginning of a word it will be pronounced as a stop (k), otherwise it will be pronounced as a spirant (kh – pronounced like the ch in the name Bach). The only other letter that will change is the letter pey - **פ**. When at the beginning of a word it will be a stop (p), otherwise it will be a spirant (ph).

### **Vowels**

Four of the Hebrew letters double as consonants and vowels. These are the **א** (al), **ה** (hey), **ו** (waw) and the **י** (yud). The al can be a glottal stop (silent pause) or the vowel sound “a”. The hey is an “h” as a consonant or an “e” as a vowel. The waw is a “w” as a consonant or an “o” or “u” as a vowel. The yud is a “y” as a consonant or an “i” as a vowel. The waw and the yud are the two most commonly used as vowels in Hebrew words. When the waw appears at beginning of a syllable it will use the consonantal “w” sound. The same with the yud which will use the consonantal “y” when at beginning of a syllable.

Another type of vowel is the implied vowel sounds. This means that the vowel is not written but is necessary in order to pronounce the word. An example of this is the word **בֶּרֶךְ** (grain) which consists of the two consonant B and R and cannot be pronounced without a vowel between them. In most cases the implied vowel will be an “a” or an “e”. In this case the implied vowel is the “a” and the word **בֶּרֶךְ** is pronounced “BaR”.

### **Syllables**

There are two types of syllables, open and closed. A closed syllable will include a consonant-vowel-consonant combination while an open syllable will have a vowel-consonant combination. The vowel may be one of the four consonant/vowel letters, usually the yud (I) or the waw (O or U) or an implied vowel. In most cases the final syllable will be a closed syllable. The word **בְּרִית** (covenant) will have two syllables.

## The Ancient Hebrew Lexicon of the Bible

The first is **ב**, an open syllable pronounced “be”, and the second is **בֵּי**, a closed syllable pronounced “riyt”.

Generally a word with three consonants will be divided as Cv-CvC. A word with four consonants will be divided as Cv-Cv-CvC or CvC-CvC. When a word includes five consonants the breakdown is usually Cv-Cv-Cv-CvC or CvC-Cv-CvC.

If the word includes one of the four consonant/vowel letters, its position within the word will determine if it is used as a consonant or a vowel. Generally, when the consonant/vowel is placed at the beginning of a syllable or the end of a closed syllable it will take on the consonantal sound. When it is in the middle of a closed syllable or the end of an open syllable it will take on the vowel sound.

### Masoretic Vowels

The Hebrew text of the Bible was originally written with only the twenty two letters of the Hebrew alphabet. About one thousand years ago a group called the Masorites created a system of dots and dashes called "nikkud" and placed them above and below the consonants to represent the vowels. It was discovered in the Dead Sea Scrolls that the four Hebrew letters, the al, hey, waw and yud, were used as vowels. The Masorites removed these vowels (usually the waw and yud) and replaced them with the nikkud. In Table 11 are some examples of Hebrew spellings of some Hebrew words in the Masoretic text and the Dead Sea Scrolls.

**Table 11**

| Passage    | Masoretic       | Dead Sea Scroll  | Translation  |
|------------|-----------------|------------------|--------------|
| Isaiah 2:2 | כָּל            | כּוֹל            | All          |
| Isaiah 2:3 | אֱלֹהֵי יַעֲקֹב | אֱלוֹהֵי יַעֲקֹב | God of Jacob |
| Isaiah 2:4 | וְלֹא           | וּלֹא            | And not      |

The Hebrew words in this lexicon have re-inserted the waw and yud wherever the nikkud pointings for the "o", "u" and "i" appear. This is to restore the spelling of Hebrew words based on the original vowels of Hebrew words rather than the nikkud.

Because the nikkud are of fairly recent origin and not part of the original Hebrew text they are not included in the *Ancient Hebrew Lexicon of the Bible*. In many cases the nikkud can be misleading causing one to rely more on them then on the consonants themselves for the meaning of the word.

## Transliterations

Some words in the Lexicon are transliterated rather than translated such as the names of unknown minerals, plants and animals, instruments and all weights and measures. The method for transliterating Hebrew letters is defined in Table 12.

**Table 12**

| Hebrew | English | Pronunciation                            |

## Lexicon Format

### Parent and Adopted Root Format

**1345)** Each two letter Parent Root is identified by a four number digit ranging from 1001 to 1529. Each three letter Adopted root is identified by a four number digit ranging from 2001 to 2910. Each four letter Adopted root is identified by a four number digit ranging from 3001 to 3067. These numbers correspond to the alphabetical order of the root.

Following the Parent or Adopted Root number is the Hebrew root written in the ancient pictographic script.

( **AB** )

The same root written in modern Hebrew script and transliterated into Roman characters using the following transliterations.

|  |    |  |    |  |    |

derived from the parent root. These words may or may not actually be derived from the Hebrew but are added as familiar associations for Hebrew word recall.

**Adopted Roots;** Following the Parent and Child Roots is a list of Adopted Roots derived out of the Parent Root. This list includes the Adopted Root number, the Adopted Root and the known action, concrete and abstract definitions of the Adopted Root.

### ***Child Root Format***

**B)** Each child root is identified by a letter ranging from A to N. Child roots designated as "A" are words derived from the Parent root itself. Child roots designated as "B" are words derived by doubling the second letter of the Parent. Child roots with designations C thru N are derived by adding one of the four consonant/vowels within the root.

~~~~~

1002) אב ( א AB) ac: **Stand** co: **Pole**  
ab: ?: The pictograph א represents strength, the ב represents the tent. Combined these mean "the strength of the house". This can be the tent poles which hold up the tent, the house, as well as the father who holds up the family, the household. (eng: pa - an exchange from a b and p and a reversal of the letters)

A) אב ( א AB) ac: ? co: **Pole** ab:  
?: The support of the tent/house.

N<sup>m</sup>) אב ( א AB) — **I. Fruit:**

This word can also be fresh fruit, the father of the next generation of trees attached to the tree (pole). [Hebrew and Aramaic]

**II. Father:** The father of the family provides the strength, support and structure to the household. The father fulfilled many functions for the family. He was the commander of the family army, provider of offspring to continue the family line, the priest and teacher. A father can be of the immediate family or a lineage such as Jacob who is the father of the

Israelites. A father can also be the patron of a profession or art. [Hebrew and Aramaic] [freq. 1229] |k|jv: father, chief, families, desire, patrimony, prince, principle, greenness, fruit| {str: 1, 2, 3, 4}

1037) פָּא (בָּא BN) ac: **Build** co: **Tent panel** ab: **Intelligence:** The pictograph פ is a picture of the tent. The פ is a picture of a sprouting seed and represents continuity as the seed continues the next generation. The combined meaning of these letters mean “the continuing of the house”. The tent was constructed of woven goat hair. Over time the sun bleaches and weakens the goat hair necessitating their continual replacement. Each year the women make a new panel, approximately 3 feet wide and the length of the tent. The old panel is removed (being recycled into a wall or floor) and the new strip is added to the tent. Since the tent is only replaced one small piece at a time the tent essentially lasts forever. (eng: beam - a component of construction with an exchange for the m and n; between - with the t added)

A) פָּא (בָּא BN) ac: ? co: **Tent Panel**

ab: ?: There are many similarities between building a tent out of goat hair panels and the building of a house out of sons (The idea of building a house with sons can be seen in Genesis 30.3). Just as the tent panels are added to continue the tent, sons are born to the family to

continue the family line. Just as the tent is continually being renewed with new panels, the family is continually being renewed with new sons.

**1319) לָלַץ** ( לָ NR) ac: **Plow** co: **Light**  
ab: ? The pictograph ל is a picture of a  
seed, the ל is a picture of the head of a  
man representing the top or beginning of  
something. Combined these mean "seed  
beginning". Rains in the mountainous  
areas cause a flooding of the rivers. The  
rivers swell causing the water to flood the  
land next to the river. This is the only  
water that the land will see and is  
necessary for crop production. After the  
flood season, the land is plowed by the  
use of a plow attached to the yoke of the  
oxen. The surface of the soil is dry but,  
when the soil is turned up it glistens in the  
sun from the water remaining in the soil.

This water is necessary for the seed to  
begin germination.

**1480) ש (ש ShR) ac: Tie co: Cord**  
ab: ? The pictograph ש is a picture of the teeth representing pressure, the ש is a picture of the head representing the top or beginning. Combined these mean "press the beginning". Ropes and cords were usually made of bark strips such as from the cedar or from the sinew (tendon) of an animal. The rope is made by twisting two fibers together. A single fiber is attached to a fixed point (top), and the two ends of the fiber are brought together. One fiber is twisted in a clockwise direction and wrapped over the other fiber in counter clockwise direction. The second fiber is then twisted in clockwise direction then wrapped around the first fiber in a counter clockwise direction. The process is repeated through the length of the rope. The twisting of the fibers in opposite directions causes the fibers to lock (press) onto each other making a stronger rope. The rope is used to tightly secure or support something, such as a load to a cart or the poles of the tent.
