# Exposing Error & Exalting Truth

The prophet Hosea made this statement in which we should all take into account; [Hosea 4:6](#)

- “My people are destroyed for lack of [knowledge](#): because thou hast [rejected knowledge](#), I will also reject thee, that thou shalt be no priest to me: seeing thou hast forgotten the law of thy God, I will also forget thy children”.

In order that we may full have knowledge concerning the issues surrounding Alohym’s calendar, we begin by first understanding where the error began starting with understanding the Clock.

### ➤ Understanding “time” the Clock!

How many of us have ever heard of the Astronomical Clock? This clock is a common instrument for astronomers who calculate the years, months and days in association with man’s calendar. The [Astronomical clock](#) (right) displays [solar time](#), of which our clocks and watches are set by along with [sidereal time](#), used for calculating the Julian/Gregorian calendar year, by the way do you know the difference? (Ref: [Wikipedia.com](#))

While reading through this research article keep in mind that the Gregorian/Julian calendar is an occultic replacement for Alohym’s true calendar. The word Occultism is used in conjunction with the Gregorian calendar or any calendar that obscures or hides Alohym’s truth from plain sight. By definition occultism is: something which obscures or covers up the real truth, like the Moon covering up the Sun during an Eclipse. In stating the above, let’s review a few foundational understandings associated with occultism concerning [man’s calendar](#) that are not biblically based. These “[manmade](#)” teachings cover up biblical truth and indoctrinate believers into a [false set of values](#).

1. “[Civil time](#)” starts at midnight and ends at midnight 24 hour later regulated by civil authorities. Mean solar time, from which civil time is derived, comes from the hour angle of the mean Sun plus 12 hours. This 12 hour offset comes from the [decision to make each day start at midnight](#) for civil purposes, as you know. [An indoctrinated tradition of man not biblically based](#).
2. “[Sidereal time](#)”, is the term used for accumulating and subtracting “daily minutes” from the 364 day solar year in order to establish the added 365<sup>th</sup> day of the Gregorian calendar.
3. The <sub>3</sub>[GC] structure has 12 months, broken down into, 1 month with 28/29 days, 7 months with 31 days and 4 months with 30 days not to mention a leap year every four year which is never mentioned in Biblical scripture.
4. The “[Equinox](#)” is commonly regarded as the “moment” when the plane of Earth's equator passes through the center of the Sun. This plane represented as a (“floating”)

## Part 5

# Exposing Error & Exalting Truth

line where the "edge" between night and day are perpendicular to the equator. This was discovered by Hipparchus, a Greek astronomer and mathematician who lived between (190-120BC) and is referred to as, Father of the precession of the equinoxes. *This precession of the equinoxes is the "foundational anchor" of the Roman calendar. It is borrowed from the Greeks and is not the equivalent of "day of equal light and darkness" the Equilux as described in the Book of Enoch.*

### ➤ The Sidereal Day

In this section you will learn about sidereal day and how it affects our lives. Sidereal time is a highly evolved calculated interval of time (*daily and yearly*) used by astronomers in an effort to maintain the Julian/Gregorian calendar structure. So you may be asking yourself what is a sidereal day? Below are two encyclopedia descriptions as well as a diagram to show you the difference between a sidereal day and a solar day, Lets read.

1. Wikipedia Encyclopedia states; *Because the Earth orbits the Sun once a year, sidereal time at any given place and time will gain about four minutes against local civil time, every 24 hours, until, after a year has passed, one additional sidereal "day" has elapsed compared to the number of solar days that have gone by.*
2. EarthSky.org; a *sidereal day* measures the rotation of Earth relative to the stars rather than the sun. It helps astronomers keep time and know where to point their telescopes without worrying about where Earth is in its orbit. Bottom line: The star Hamal, (Equinox Star) also known as Alpha Arietis, is the brightest star in Aries the Ram. Thousands of years ago, the sun was in conjunction – or aligned north and south – with this star at the time of the March equinox. Now today, we see the sun in front of Pisces at the time of the March equinox. But people still refer to the sun's location at the equinox as the First Point in Aries.

This diagram illustrates how Sidereal time occurs. Every 24 hours, the Earth spins once around its axis as the sun loops around the sky. From noon to noon or the time it takes the sun to return to its highest point in the sky is how we define the days of the week. Astronomers call this a *solar day*. Let's now get a little deeper into the sidereal day and see just how this day came about and how it is calculated. (Ref: Wikipedia)

In 45BC, Rome instituted the Julian calendar, replacing its inaccurate lunar calendar for a much more accurate solar/lunar based system having 365 days with a leap year every 4 years. To achieve this feat the solar day was shorted by 9.86 seconds per hour making the 60 minute hour now approximately 59 minutes and 50 seconds. The "9.86 Seconds per hour"

## Part 5

### Exposing Error & Exalting Truth

equates to approximately 4 minutes per day (3.95 minutes per day), are in turn subtracted from 364 true solar days then totaled together creating the 365<sup>th</sup> day of the Gregorian calendar know as December 31<sup>st</sup>. This is why calendar days are called Sidereal Days, as each day has 23 hours, 56 minutes, and about 5 seconds, and it is not a true 24 Hour Day.

Below are the formulas used to create the Sidereal Day or extra day each year, it basically just removes minutes from the original 364 day/solar year to create another day: (Notice)

1. 364 days X 1440 min. per day = 524,160 min. per 364 day year
2. 524,160 / 365 = 1436.05479... minutes per day in a 365 day year
3. 1440 - 1436.05479... = 3.9452... minutes taken out of each of the 364 days OR  
9.86 seconds taken out of each hour: (3.9452 min. X 60 sec. = 236.7123... sec.  
per day / 24 hours = 9.86 seconds taken out of each hour)
4. 1436.05479... Min. per day / 60 min. = 23.934246575 hours in each of the 365 days
5. 0.934246575 X 60 = 56.054794520... Minutes & seconds
6. Total: 23 hours, 56 minutes, and 0.05 seconds in each of the Gregorian 365 days, as compared to exactly 24 Hours in each of Alohym's 364 days.

“What about Leap year” you may ask? Well, remember it takes 365.25 sidereal days for the Julian year to orbit the Sun in the same space and time it takes Alohym's 364 days. You are probably wondering how that can be, the time difference between both calendars comes from the involvement of the “Equinox”, (more on this in the next section). Here is how leap years are created, each “common 365 day year” (every year minus leap year) eliminates the .25 or 6 hours from the previous four (365.25) sidereal years. The astronomers then add the .25hrs x 4yr = 1, - 24 hour day creating the 366<sup>th</sup> leap year day February 29<sup>th</sup>, which is inserted into the Gregorian calendar at the end of the 9<sup>th</sup> week every fourth year. (Note: February 29<sup>th</sup> is also the Julian calendar date 60)

Using the calculations used for creating the extra days, can you see how the minutes are extracted – these minutes do exist, but the actual added days do not. In other words, the added yearly minutes means that the Earth needs to spins another 24 hours (one extra day) past the solar 364 day year in order to end the Julian/Gregorian calendar year.

#### ➤ Man's Equinox

When Julius Caesar established the Julian calendar in 45 BC, he set March 25<sup>th</sup> as the date of the spring equinox. Because the Julian year (365.25 days) is slightly longer than the tropical year, the calendar "drifted" with respect to the two equinoxes — such that in 300 AD the spring equinox occurred on about 21 March. By 1500 AD, it had drifted backwards to the 11<sup>th</sup> of March.

## Part 5

### Exposing Error & Exalting Truth

This drift prompted [Pope Gregory XIII](#) to create a modern [Gregorian calendar](#). The Pope wanted to continue to conform to the edicts concerning the [date of Easter](#) of the [Council of Nicaea](#) of AD 325, which means *he wanted to move the vernal equinox to March 21<sup>st</sup>*, which is the day allocated to it in the Easter table of the Julian calendar. However, the leap year intervals in his calendar were not smooth (400 is not an exact multiple of 97). This causes the equinox to oscillate by about 53 hours around its mean position. This in turn raised the possibility that it could fall on March 22<sup>nd</sup>, and thus Easter Day might theoretically commence before the equinox. *The astronomers chose the appropriate number of days to omit so that the equinox would swing from the 19<sup>th</sup> to 21<sup>st</sup> of March* but never fall on the 22<sup>nd</sup> (although it can in a handful of years fall early in the morning of that day in the Far East). (Reference: Wikipedia)

Another factor that rules out the Equinox from having anything to do with Alohym's true calendar is the ruling star is called Hamal, (HamEl), in constellation Aries. This star is the Gregorian calendar's "Equinox Star," by using this star instead of our own Sun makes each day 23 hours, 56 minutes and about 5 seconds long in its circuit which is called a, "sidereal day", of which you have already learned.

#### ✓ [Commentary](#)

Here again we see the influences of men not consulting biblical knowledge, thinking they can do things better than our Creator. Leading those who are truly seeking Alohym down another path of deception! Our adversary is a counterfeiter; he portrays himself as a light deceiving the whole world. (Rev 12:9) Since our adversary hates the light it is interesting that the word "Nox" means night and is the Roman goddess of the night of which came from its Greek counterpart Nyx.

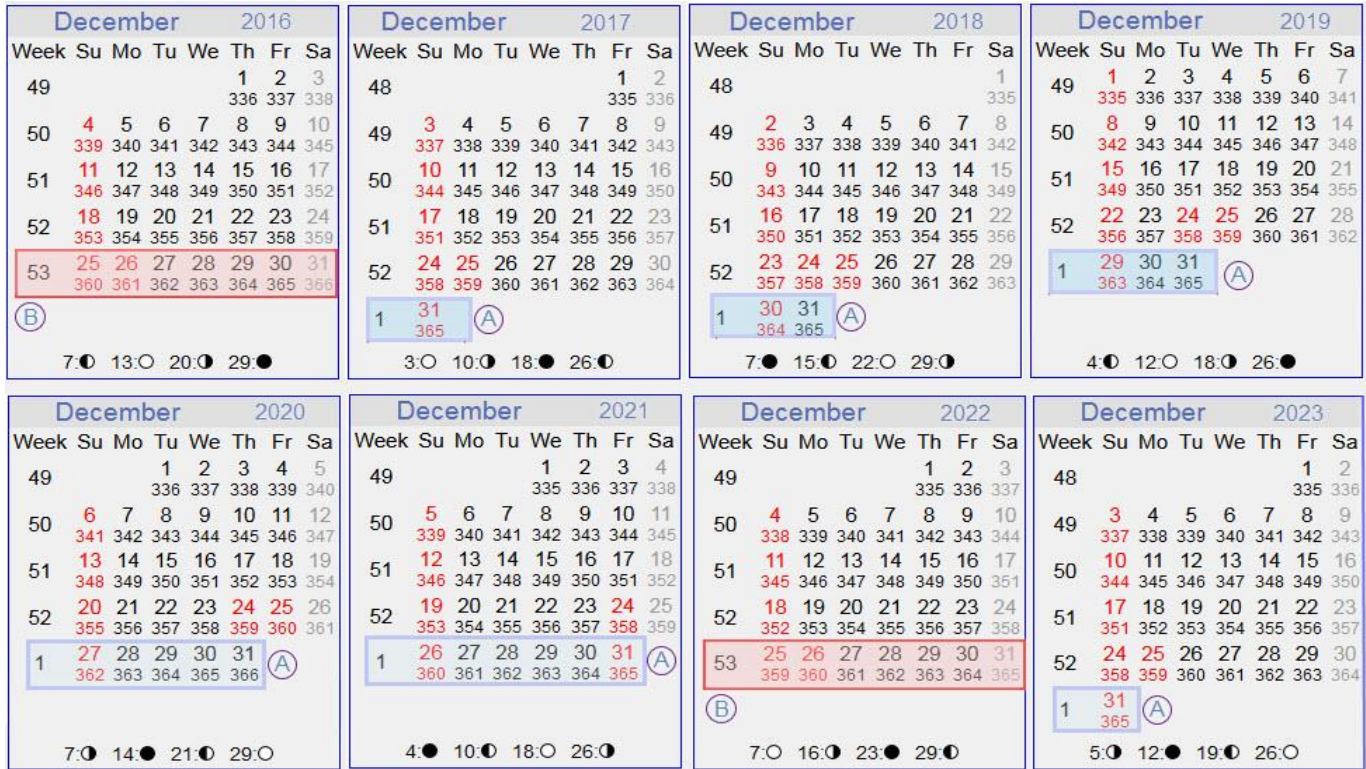

#### ➤ [Understanding Equinox "weekly Shift cycle"](#)

In the previous section, you learned how the equinox oscillates up to 52 hours depending on what year within leap cycle we are in. Another inherited problem created by anchoring the equinox to the Julian calendar is the perpetual "*weekday shift cycle*". The best and easiest way to explain this event is by example; Say your birthday is on Tuesday March 5<sup>th</sup>, but now one year later its Wednesday March 5<sup>th</sup>, in two years it will be Thursday, March 5<sup>th</sup>, but did you really gain a day in time? Think deeply; it is the same date (March 5<sup>th</sup>) but a different day of the week, this phenomenon is due to the "weekly shift cycle".

The graphic on page 5 represents the insertion of the 53rd week in the Julian/Gregorian calendars which occurs once every 7 years. (Exhibit; [B Red Box](#) in years 2016 & 2022) This phenomenon is due to the accumulation of sidereal days 365 and 366, which are placed within the "*added*" 1<sup>st</sup> week in December. Notice (Exhibit; [A Blue Box](#) in years 2017 & 2023) Once the sidereal accumulation occurs (i.e. week 53, (years; 2016 & 2022) the "weekly shift cycle" is complete and then reset for the next cycle to begin.

# Part 5

## Exposing Error & Exalting Truth

### ✓ Commentary

Keep in mind the example above and the shifting error which occurs due to the Equinox. The 5 [J/G] calendar is the “Modern (Roman) Christian Calendar” which anchors the equinox as its yearly starting point and has since its inception. The upcoming Chart “A” below reveals how the (sidereal) weekday shift operates as if floats around Alohym’s fixed position calendar days. (364 – 1) *Important to remember*; [Genesis 1:16](#) states;

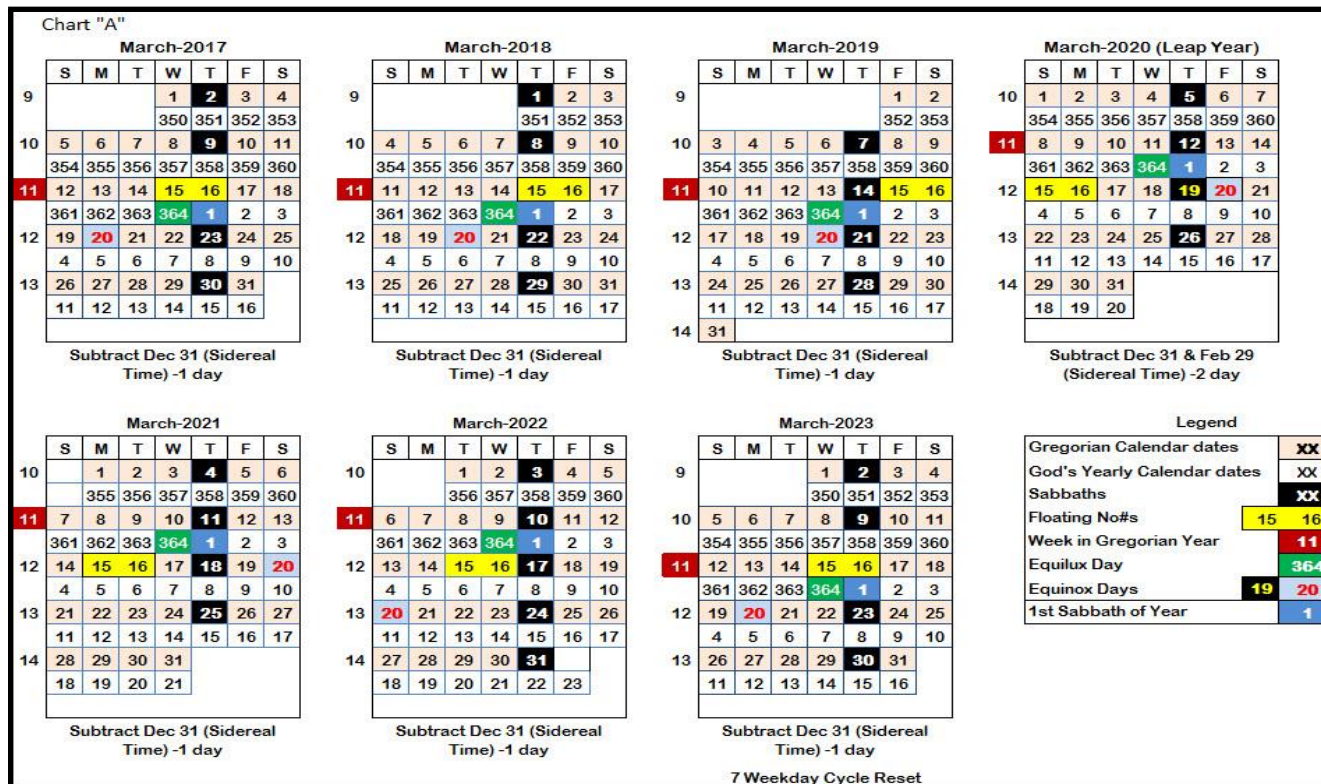

v16; And God made two great lights; the greater light to rule the day, and the lesser light to rule the night the stars

Alohym also states in [Gen.1:14](#) that the light in the heavens rule the day, night and are for signs, seasons, day and years. Question, from Alohym’s perspective is the Earth a light in the heavens, Simply **NO!** The Equinox is an Earthly occurrence which **disqualifies** if from having anything to do with Alohym’s scriptural based perfect calendar.

Keep in mind (*from the graphic above*) how the “weekday shift cycle” functions at the end of December each year. Now you will learn how the “weekday shift cycle” days float around Alohym’s New Year.

# Part 5

## Exposing Error & Exalting Truth

Above, Chart "A" represents this truth by showing how the "weekday shift cycle" occurs starting with the month of March 2017 through 2023. Please take a moment to read through descriptions 1 thru 3 below.

1. Notice the numbers **364 - 1** within Chart "A", these two days represent the last day of the previous year and the 1<sup>st</sup> day and Sabbath of the New Year, which have a fixed position. Take notice; these days always remain on Wednesday and Thursday in the eleventh (11<sup>th</sup>) & 12<sup>th</sup>) weeks of the Gregorian calendar. (*keep this in mind*)
2. Next, notice the numbers **15-16** in yellow, which represent floating Gregorian calendar dates within the month of March. In 2017, these numbers resided on the same days as Alohym's fixed position calendar dates **364 - 1** i.e. Wednesday and Thursday. Now, follow the numbers **15-16** from 2017 through 2023, notice their movement to the right always residing within the 11<sup>th</sup> and 12<sup>th</sup> weeks within the month of March. This shifting phenomenon is due to the added sidereal time, days (365 & 366) all stemming from the anchoring of the Equinox to the original Julian calendar.
3. Next when viewing Chart "A", notice at the bottom of each month it states "Subtract" Dec 31 (-1), Feb 29 (-2) etc., this represents the *accumulated sidereal time* that would need to be omitted from the Gregorian calendar to stop the "shifting 7 year sidereal cycle". (*Reference: omit (-1 day) for years 2017, 18, 19, 21, 22, for a total of 5 days and omit (-2 days) for 2020, leap year*) In other words, by eliminating the extra 365<sup>th</sup> and 366<sup>th</sup> accumulated sidereal time within that specific calendar year would stabilize and end the shifting cycle.

## Part 5

# Exposing Error & Exalting Truth

### ➤ Alohym's Fixed Calendar

Our Creator is not the author of confusion. Sometimes the simplest of truths seem to be fleeting. In His grace and mercy, Alohym has revealed the perfection of his calendar to His people, scripture reveals how it functions and its starting point as described in the Books of Enoch, Jubilees and the Tanakh which begins in the month of Abib. (Ref: Jubilees' 6, Exodus 12:2, Exodus 13:4, and Exodus 23:15, Deut. 16:1) Before moving forward, here is a scripture from the Book of Jubilees' which states Alohym's ordained calendar is anchored to a fixed position within the year. Jubilees' 6:29.

v29; Thus it is engraved and ordained in the tablets of heaven, and there is no transgression from one year to another. And thou command the children of Israel that they should observe the years in this number, three hundred and sixty-four days, and the year shall be complete and the fixed date of their days and their festivals shall not be corrupted, for everything transpires in them according to their testimony; and they [Israel] shall not miss a day or corrupt a festival.

### ➤ Alohym's calendar is mathematically perfect

Alohym is the Creator of perfection of which the chart below shows you this perfection through a simple mathematical formula. According to astronomers the Earth takes 364, twenty four hour "solar" days to orbit the Sun, which means the Earth just finished a *360° degree elliptical revolution* around the sun. Now if the Earth completed its orbit in 360 days, this would mean that the "Daily Orbital

Table 1 = 364 Day Year

	Daily Orital Angle	Monthly Beginning Day	Monthly Degree Total		
Day one	0.989010	1.00	0.989	Month 1	Spring
	0.989010	31.00	30.659	Month 2	
	0.989010	61.00	60.330	Month 3	
2 Day Solstice	0.989010	91.00	90.000	Leader Day	
	0.989010	92.00	90.989	Month 4	Summer
	0.989010	122.00	120.659	Month 5	
	0.989010	152.00	150.330	Month 6	
2 Day Solstice	0.989010	182.00	180.000	Leader Day	
	0.989010	183.00	180.989	Month 7	Fall
	0.989010	213.00	210.659	Month 8	
	0.989010	243.00	240.329	Month 9	
2 Day Solstice	0.989010	273.00	270.000	Leader Day	
	0.989010	274.00	270.989	Month 10	Winter
	0.989010	304.00	300.659	Month 11	
	0.989010	334.00	330.329	Month 12	
2 Day Solstice	0.989010	364.00	360.000	Leader Day	
	0.989010		0.989		

Angle" would be 1° degree per day but since we are completing a 364 days year with respect to a 360° degree orbit would mean that the "Daily Orbital Angle" will be a little less than 1° or .989° degrees. There can be no coincidences in these three numbers because they add up to "26" יהוה (YHWH), Yahuah the name of our Creator. For fun we decided to take the decimal degrees out six places and this is what showed up, .989010, the number 26 for the first three numbers and 10 for the last three, meaning *completed course of time or completeness in divine order*. Next let's review the perfect orbital angle numbers making up Alohym's calendar which makes it so perfect.

## Part 5

# Exposing Error & Exalting Truth

Table “1” is a testament to Alohym’s perfect orbital numbers for each month, season and year. Notice the **red arrows** on the left of table “1” which states: (2 Day Solstice). These solstices are the leader day and the 1<sup>st</sup> day of the season, which means that the sun seems to stand still at the same spot for two days. Now notice the blue highlighted cells on the rightside of the chart and notice the repeating numbers for each season, Spring - .989, Summer - 90.989, Fall – 180.989 and Winter – 270.989 and of course the last day of the year with the number 360.000, can you see the perfection in Alohym’s creation and calendar!

### ➤ Man’s Imperfect calendar

Table “2”, 365 day Common year has been formulated to show through the added columns, “*Min. per Day Subtracted*” and “*Monthly Added Min. per Day Total*” how the 365<sup>th</sup> day of the Julian/ Gregorian year is created. If you compare Alohym’s daily orbital numbers with mans there really is no comparison. The proof is in the numbers which proves that Alohym’s solar calendar is perfect and without flaw.

Table 2 - 365 Day Common Year

Sidereal Orbital Angle	Day No.	Monthly Degree Total	Min.Per Day Subtracted	Monthly Added Min.Per Day Total	
0.985653	1.00	0.986	3.9452	3.9452	January 1
0.985653	31.00	30.555	3.9452	122.3014	February 1
0.985653	61.00	60.125	3.9452	240.6575	<u>March 1</u>
0.985653	92.00	90.680	3.9452	362.9589	April 1
0.985653	122.00	120.250	3.9452	481.3151	May 1
0.985653	152.00	149.819	3.9452	599.6712	<u>June 1</u>
0.985653	183.00	180.374	3.9452	721.9726	July 1
0.985653	213.00	209.944	3.9452	840.3288	August 1
0.985653	243.00	239.514	3.9452	958.6849	<u>September 1</u>
0.985653	274.00	270.069	3.9452	1080.9863	October 1
0.985653	304.00	299.639	3.9452	1199.3424	November 1
0.985653	334.00	329.208	3.9452	1317.6986	<u>December 1</u>
0.985653	364.00	358.778	3.9452	1436.0548	December 30
0.985653	365.00	359.763	3.9452	1440.0000	December 31
0.985653	1.00	360.749	3.9452	3.9452	January 1

The underlined months to the right are the Meteorological start of mans seasons

The fomula’s used in creating Table “2” are the same sidereal day fomula’s found on page 3. Below the comparison chart that will help you see the difference between Table 1 & 2. Notice the accumulated 1440 minutes (*follow the red arrow*) which reflects the created 365<sup>th</sup> day of the Julian/ Gregorian calendar.

Comparison Chart - Table 3						
	Orbital Angle	Day of Year	Yearly total degrees	Day of Year		
Table 1	0.98901	364	360	Leader Day (364)		
	0.98901	1	0.989	Day 1, Sabbath		
Table 2	0.985653	364	358.778	3.9452	1436.0548	30-Dec
	0.985653	365	359.763	3.9452	1440	31-Dec
	0.985653	1	360.749	3.9452	3.9452	1-Jan

ST = Sidereal Time

Notice: The Earth must rotate 1 extra revolution to make day 365. This is accomplished by adding 1436.0548 + 3.9452 = 1440 (Accumulative (ST) + Daily total (ST))

Also notice in the comparison chart just what days reflect the completion of Earths 360° revolution, Table 1, day 364 and in Table 2, day 1. Explained above is how Alohym’s true cycles of time i.e. calendar is perfect in it’s days, seasons and orbit around the Sun compared to the Gregorian/Julian calendar with it’s integration of the Equinox system.

### ✓ Commentary

Now that you have been exposed the occultic deception of the Equinox and Sidereal time what about the days of the week? Believe it or not they are not in the same orginal lineup as described in Genesis chapter 1 & 2, but interestingly to man’s calendar system. The question becomes; is there a presumption that fits the narative that explains the changing of the weekly day order? As a writer, I can tell you through historical and scriptural research that it was the traditions and doctrines of men that

## Part 5

### Exposing Error & Exalting Truth

distorted Alohym's true Sabbath covenant calendar. The articles and information you are about to read explain in great detail how the Jewish Rabbinical Sages as well as the Roman religious leaders and emperor Constantine changed the last 1800 years of biblical time.

The articles you are about to read from various authors have been researched and exhibit true and accurate historical information. Too often believers coming into the understanding that relationship with our creator requires obedience to the 4<sup>th</sup> commandment, simply assume that Saturday is the Sabbath day, but why? Ecclesia, it is time we learn and embrace the truth of history and let go of the traditions and doctrines of men and their false religions!

#### ✓ Roman Time Measurement (Article 1)

(Resource: By Publius Dionysius Mus)

The Roman republican calendar ( $\pm$  600 BC) counted 355 days and followed the cycle of the moon. To cover the difference between sun and moon, there was a special creation every two years: *intercalaris* or *mercedonius*. The last five days of *Februarius* were then transformed into a period of 27 or 28 days. In 153 BC they decided to let the year begin on the first day of *Ianuarius*, but the old names were kept to remember the old system (*September*, the 'seventh' month, now became the ninth month). The *intercalares* however were not always strictly followed, and this created after a while a huge difference between the actual seasons and the calendar: in 50 BC Spring began half May...

This problem was solved in 46 BC by *Caius Julius Caesar*, as *pontifex maximus*. He brought the seasons back to normal by adding 67 extra days to that year. From that year on, the calendar followed the sun, every year being  $365 \frac{1}{4}$  long (so every four years one extra day was needed to come back to normal). The twelve months were kept, with their original names, but their length was adapted to fit the new system. In 44 BC, in remembrance of *Julius Caesar's* death, the name of the month *Quintilis* was changed into *Julius*.

A last reform came in 8 BC: because of a mistake (they added an extra day every three years instead of every four years) the period between 8 BC and AD 4 knew no leap year. The month *Sextilis* was also renamed in this year: it became *Augustus* (and an extra day was added to this month, in order not to be shorter than Caesar's month).

The Romans knew no such thing as a week; the seven days "week" will only be introduced by Constantine in the fourth century in 321 A.D.

As stated before, the week as we know it had religious origins, and was introduced by Constantine the Great. The (new) week began on <sup>[1]</sup> *Feria Prima*, also called *Feria Dominica*, *Dominica* or *Dies Dominicus*. Then came <sup>[2]</sup> *Dies Secunda*, <sup>[3]</sup> *Tertia*, <sup>[4]</sup> *Quarta*, <sup>[5]</sup> *Quinta*, <sup>[6]</sup> *Sexta* and the week ended on <sup>[7]</sup> *Feria Septima* (also *Sabbatum* or *Dies Sabbatinus*). (Note: the naming of the seventh day (*Septima*) – (*Sabbath*) came from the Roman 7<sup>th</sup> hour of the day) But there was also an older system used, of Babylonian -

## Part 5

### Exposing Error & Exalting Truth

Egyptian origin. In this system every hour of the week was dominated by one of the seven known planets (Sun, Moon, Saturnus, Mars, Mercurius, Jupiter and Venus). They all followed onto each other continuously, resulting in the following days of the week: <sup>[1]</sup> Dies Saturni, <sup>[2]</sup> Dies Solis, <sup>[3]</sup> Dies Lunae, <sup>[4]</sup> Dies Martis, <sup>[5]</sup> Dies Mercurii, <sup>[6]</sup> Dies Iovis and <sup>[7]</sup> Dies Veneris.

The older Babylonian – Egyptian system which was also adopted by Roman culture began naming the week days starting from the 1<sup>st</sup> day of the week (Saturn’s Day) – (Saturday), as history tells the story very plainly and openly it was Constantine the Great in 321 AD., that changed the weekly order as stated above and Saturday (*English*) became the 7<sup>th</sup> day of the week.

The Romanic languages kept most of this system (except Dies Solis, which became the Day of the Lord). The Germanic languages replaced most of these names with Germanic gods: Tiw, Wodan/Odin, Donar/Thor and Freya. We can summarize this in the following table:

FRENCH	SPANISH	ENGLISH	GERMAN
Lundi	Lunes	Monday	Montag
Mardi	Martes	Tuesday	Dienstag
Mercredi	Miércoles	Wednesday	Mittwoch
Jeudi	Jueves	Thursday	Donnerstag
Vendredi	Viernes	Friday	Freitag
Samedi	Sábado	Saturday	Samstag
Dimanche	Domingo	Sunday	Sonntag

#### ✓ [Seven-day planetary week \(Article 2\)](#)

(Resource: [www.worldslastchance.com](http://www.worldslastchance.com))

The decline of the eight-day Roman week was caused by two factors: A) the expansion of the Roman Empire which exposed the Romans to other religions and led, in turn, to B) the rise of the cult of Mithras. The role Mithraism played in restructuring the Julian week is significant for it was a strong competitor of early Christianity.

It seems as if some spiritual genius having control over the pagan world had so ordered things that the heathen planetary week should be introduced just at the right time for the most popular Sun cult of all ages to come along and exalt the day of the Sun as a day above and more sacred than all the rest. Surely this was not accidental.

Under these two factors, the Julian week began a centuries-long evolutionary process that ended in the week as it is known today. The original seven-day planetary week is the third and final piece of the puzzle [proving that Saturday is not the Bible Sabbath](#), nor Sunday the first day of the Biblical week. This transformation took several hundred years. Franz Cumont, widely considered to be a great authority on Mithraism, links the acceptance of the seven-day week by Europeans to the popularity of Mithraism in pagan Rome:

## Part 5

### Exposing Error & Exalting Truth

It is not to be doubted that the diffusion of the Iranian [Persian] mysteries has had a considerable part in the general adoption, by the pagans, of the week with the Sunday as a holy day. The names which we employ, unawares, for the other six days, came into use at the same time that Mithraism won its followers in the provinces in the West, and one is not rash in establishing a relation of coincidence between its triumph and that concomitant phenomenon.

In Astrology and Religion among the Greeks and Romans, Cumont further emphasizes the pagan origins and recent adoption of a seven-day week with its holy day being Sunday:

"The pre-eminence assigned to the dies Solis [day of the Sun] also certainly contributed to the general recognition of Sunday as a holiday. This is connected with a more important fact, namely, the adoption of the week by all the European nations.

The immense significance of this for Christians is found in the fact that Sunday cannot be the day on which Christ arose from the dead, because Sunday did not exist in the Julian calendar of Christ's day. Nor can Saturday be the Biblical seventh-day Sabbath because the pagan planetary week originally began on Saturday.

The following drawing of a stick calendar found at the Baths of Titus (constructed A.D. 79 – 81) provides further proof that neither the Biblical Sabbath nor the day of Christ's resurrection can ever be found using the Julian calendar. The center circle contains the 12 signs of the zodiac, corresponding to the 12 months of the year. The Roman numerals in the left and right columns indicate the days of the month. Across the top of the stick calendar appear the seven planetary gods of the pagan Romans.

Saturday, (or dies Saturni - the day of Saturn) was the very first day of the week, not the seventh. As the god of agriculture, he can be seen in this preeminent position of importance, holding his symbol, a sickle. Next, on the second day of the pagan planetary week, is seen the sun god with rays of light emanating from his head. Sunday was originally the second day of the planetary week and was known as dies Solis. The third day of the week was dies Lunae (day of the Moon - Monday). The moon goddess is shown wearing the horned crescent moon as a diadem on her head. The rest of the gods follow in order: dies Martis (day of Mars); dies Mercurii (day of Mercury); dies Jovis (day of Jupiter); and dies Veneris (day of Venus), the seventh day of the week.

Roman Stick Calendar

## Part 5

### Exposing Error & Exalting Truth

When the use of the Julian calendar with its recently adopted pagan planetary week spread into northern Europe, the names of the days dies Martis through dies Veneris were replaced by Teutonic gods.<sup>23</sup>Mars' Day became Tiw's Day (Tuesday); Mercury's Day became Woden's Day (Wednesday); Jupiter's Day became Thor's Day (Thursday); and Venus' Day became Friga's Day (Friday.)<sup>24</sup> The influence of the pagan astrological day-names is still seen today. Latin-based languages, such as Spanish, retain astrological names for Monday through Friday, with the Christian influence being seen in their words for Sunday (Domingo, or Lord's Day) and Saturday (Sabado, or Sabbath.)

#### ✓ In Rome (Article 3)

(Resource: [www.wikipedia.com](http://www.wikipedia.com))

Even though Roman numerals are shown on the block's face, (on page 3) this was not an *official* Roman calendar. That's apparent because early Romans used an eight-day week, not one of seven days. Also, official Roman calendars never had twelve thirty-day months for a calendar year length of 360 days like the one shown here. *Roman soldiers stationed in Egypt became accustomed to the pagan seven-day week and began to introduce it into their own homeland to replace their eight-day marketing week. Octavian (Caesar Augustus) and succeeding Roman rulers permitted this practice but it wasn't made official until the emperor Constantine took that step in A.D. 321.* Constantine not only instituted the 7 day weekly cycle he also changed the first day of the week "Saturn's day" (Saturday) to the seventh (7<sup>th</sup> day) of the week, of which has never changed to this day!

Now at the same time Roman emperor Constantine legislated that the *venerable Sunday* should be a day of rest for all citizens. In A.D. 323, he issued a decree banning Christians from participating in state sacrifices. After the pagan gods had disappeared from his coinage, Christian symbols appeared as Constantine's attributes the chi rho between his hands or on his [labarum](#), as well on the coin itself.

#### ✓ Are you starting to get the Picture?

Let's move on to a very common argument in which many defend the "Jewish calendar" as keeping the record straight that Saturday is the Sabbath and 7<sup>th</sup> day of the week. The first problem that comes with the above statement is that Saturday the 7<sup>th</sup> day (*Based on the Julian calendar*) never followed God's original calendar that ancient Israel kept. Secondly "Judaism's Saturday Sabbath" beginning in the late 4<sup>th</sup> century was established with the introduction of the new Jewish calendar by Hillel II in 395 AD. The Saturday Sabbaths (*Julian based*) and the Festival days of God (*as calculated by the (Lunar) Jewish calendar*) fall on two different calendars. Did you catch that?

Late in the 2<sup>nd</sup> century as described by the late ([Rabbi Simon Schwab 1908-1995](#) along with Jewish commentators as recorded by the Jewish document (Seder Olam Rabbah), that the Jewish sages decided according to the "will of God", to abandon the sacrificial calendar which Christ followed and institute the Seleucid Era Calendar, (the Babylonian calendar) of which each month consisted of 29.5 days. (Ref: <https://webpace.science.uu.nl/~gent0113/babylon/babycal.htm>) The sage's falsified data to confuse

## Part 5

### Exposing Error & Exalting Truth

the Gentiles who might try to use Daniels prophecies in predicting the time of the Messiah's coming. The sage's decided to "seal" up the Book of Daniel and its "69 week" prophecy of Messiah's coming and death, as states in Daniel 9 and to honor Daniel 12:4, "shut up the words, and seal the book even to the time of the end". Did you get that? (**Note: Take a moment and reflect on the accusation being brought against God himself because of the sage's deception!** (Ref: *Comparative Jewish Chronology*", Dr. Joseph Brewer Jubilee Volume, (New York: Rabbi Samson Raphael Hirsch Publications Society, Philipp Felheim Inc., 1962), p.188

#### ✓ Moses Prophecy of Calendar Corruption!

In the Book of Jubilees', chapter 6, the writer prophesied that Israel would not follow the 364 day, 4 season, 13 week per season year, let's read.

v29; Thus it is engraved and ordained in the tablets of heaven there is no transgression from year to year. v30; And thou command the children of Israel that they should observe the years in this number, three hundred and sixty-four days, and the year shall be complete and the fixed date of their days and their festivals shall, not be corrupted, for every thing transpires in them according to their testimony; and they [Israel] shall not miss a day or corrupt a festival. v31; But if they do transgress and do not observe them according to his commandment, then will be corrupted all their fixed dates, and the years will waver in consequence, and also their times and their years, and they will transgress their ordinances. v32; And all the children of Israel will forget and will not find the paths of the years, and will forget the new month and the sabbaths and the festivals, and in all the order of the years they will err. v33; For I know, and from now on I shall make it known to thee, and not from my heart, but thus is written in a book before me and is ordained in the tablets of heaven, the division of the days, that they forget not the festivals of my covenant and walk according to the festivals of the ,gentiles, after their errors and after their ignorance, v34; And there will be those who will make observations of the moon, for this one [the moon] corrupts the stated times and comes out earlier each year by ten days. v35; And in this way they will corrupt the years and will observe a wrong day as the day of testimony and as corrupted festival day, and everyone will mix holy days with unclean ones and unclean with holy ; for they will err as to months and sabbaths and festivals and jubilees. v36; And on this account I command thee and testify to thee that thou shouldst testify to them, for after thy death thy children will corrupt, so that they make a year only three hundred and sixty-four days, ' and on this account they will err as to new months and sabbaths and fixed times and festivals and will ever eat blood with all kinds of flesh.

Moses, a prophet and Holy man of God warned Israel and future generations in advance of what was to come but did Israel listen? You already know the answer! Let's read what the prophet Hosea stated in chapter 4 verses 1 and 6;

## Part 5

### Exposing Error & Exalting Truth

- [Hosea 4:1](#); Hear the word of the LORD, ye children of Israel: for the LORD hath a controversy with the inhabitants of the (earth) land <sup>H776</sup>, because [there is] no truth, nor mercy, nor knowledge of God in the (earth) land.
- [Hosea 4:6](#); My people are destroyed for lack of knowledge: because thou hast rejected knowledge, I will also reject thee, that thou shalt be no priest to me: seeing thou hast forgotten the law of thy God, I will also forget thy children.

#### ✓ [Commentary](#)

I believe that the Jewish (Babylonian) calendar as prophesied in the Book of Jubilees' needs to be put to the test. Question; can the Jewish calendar pass the test of scriptural language? According to this research along with historical, scientific and scriptural evidence it does not! Again, I believe in being fair and unbiased and let the facts of scripture speak for themselves.

#### ➤ [The Jewish \(Babylonian\) calendar](#)

The following article is reproduced from a Jewish website. It explains that the Jewish calendar is based on three astronomical phenomena: the rotation of the Earth about its axis (a day); the revolution of the moon about the Earth (a month); and the revolution of the Earth about the sun (a year). These three phenomena are independent of each other, so there is no direct correlation between them.

#### ✓ [Commentary](#)

Ecclesia all around the world are walking out of the modern (Sunday) Christian belief system mostly because they are not being feed by God's word. Some are coming to the realization that God's 4<sup>th</sup> commandment concerning the Sabbath day observance as well as the law of God which never ceased to exist. Those realizing that a Sabbath day observance should be kept get caught up in societal thinking that the Jews Saturday observance of the Sabbath is the right one? Knowledge and evidence is the key to discerning God's Sabbath not the religious traditions men. Now back to understand the Jewish (Babylonian) calendar.

The lunar month on the Jewish calendar begins when the first sliver of moon becomes visible after the dark of the moon. In ancient times, the new (*moon*) months were determined by observation. When the new moon, was observed a messenger would notify the Sanhedrin. When the Sanhedrin heard testimony from two independent, reliable eyewitnesses that the new moon occurred on a certain date, they would declare the [Rosh Chodesh](#) (first of the month) and send out messengers to tell people when the month began. [The problem with strictly lunar calendars is that there are approximately 12.4 lunar months in every solar year, so a 12-month lunar calendar is about 11 days shorter than a solar year and a 13-month lunar is about 19 days longer than a solar year. The months drift around the seasons on such a calendar](#): on a 12-month lunar calendar, the month of Nissan, which is supposed to occur in the spring, would occur 11 days earlier in the season each year, eventually occurring in the winter, the fall, the summer, and then again in the spring. On a 13-month lunar calendar, the same thing would happen in the other direction, and faster.

## Part 5

### Exposing Error & Exalting Truth

To compensate for this drift, the Jewish calendar uses a 12-month lunar calendar with an extra month occasionally added. The month of Nissan occurs 11 days earlier each year for two or three years, and then jumps forward 30 days, balancing out the drift. In ancient times, this month was added by observation: the Sanhedrin observed the conditions of the weather, the crops and the livestock, and if these were not sufficiently advanced to be considered "spring," then the Sanhedrin inserted an additional month into the calendar to make sure that Pesach (Passover) would occur in the spring (it is, after all, referred to in the Torah as Chag he-Aviv, the Festival of Spring.).

A year with 13 months is referred to in Hebrew as Shanah Me'uberet (pronounced shah-NAH meh-oo-BEH-reht), literally: **a pregnant year. In English, we commonly call it a leap year.** The additional month is known as Adar I, Adar Rishon (first Adar) or Adar Aleph (the Hebrew letter Aleph being the numeral "1" in Hebrew). The extra month is inserted before the regular month of Adar (known in such years as Adar II, Adar Sheini or Adar Beit). Note that Adar II is the "real" Adar, the one in which Purim is celebrated, the one in which yahrzeits for Adar are observed, the one in which a 13-year-old born in Adar becomes a Bar Mitzvah. Adar I is the "extra" Adar. (*Note: All 3, not derived from scripture*)

- In the fourth century, Hillel II established a fixed [lunar] calendar based on mathematical and astronomical calculations. This calendar, still in use, standardized the length of months and the addition of months over the course of a 19-year cycle, so that the lunar calendar realigns with the solar years. Adar I is added in the 3rd, 6th, 8th, 11th, 14th, 17th, and 19th years of the cycle. <http://www.jewfaq.org/calendar.htm>

What should alarm Alohym's people is that nowhere in the Bible does it state that Alohym's calendar ever had, or should ever have, 13 months. As presented in part 5 in scripture, Alohym's calendar has always had 12 months. Alohym's Word makes no provision for human adjustments – it's already perfect! The 13<sup>th</sup> month in the lunar calendar is simply not Biblical. It does not fulfill the requirements of the calendar of Alohym. This is of great significance to the ecclesia, to realize that the Church and Sabbath keeping has been using a lunar calendar to calculate the annual Feasts.

A minimal amount of research on the lunar calendar will reveal that this calendar used by the Jews and others actually originates in Babylon. This may come as a shock to some, but this is the historical reality!

The lunar calendar is made up of 29.53 days a month and not 30 days as the Bible states that it should have. This means that the lunar calendar is made up of 354 days a year and not 360 days a year as the Bible states that it should have! To compensate, the lunar calendar inserts an additional thirteenth month seven times in every 19-year time cycle. *This Babylonian non-Jewish Seleucid calendar is being used by the Church to determine Alohym's Feast days!*

#### ➤ Alohym's 12 calendar months – never 13

Scripture also tells us that a year on Alohym's calendar has 12 months. Notice: ([Esther 3:7](#)).

## Part 5

### Exposing Error & Exalting Truth

v7; “In the first month, that is, the month Nisan [should read, Abib], in the twelfth year of king Ahasuerus, they cast Pur, that is, the lot, before Haman from day to day, and from month to month, to the twelfth month...”

Again, this verse demonstrates that a year has twelve months. Let us take a look at another scripture that proves that a year has only 12 months: [Revelation 22:2](#)

v2; “In the midst of the street of it, and on either side of the river, was there the tree of life, which bare twelve manner of fruits, and yielded her fruit every month: and the leaves of the tree were for the healing of the nations”

The twelve fruits discussed in the above verse are for the twelve months of the year, one for each month.

The problem with the lunar calendar that most use to calculate their annual Feast days is that its months are 29.53 days long, and has a thirteenth month seven times in every 19 years! Please understand! Alohym’s calendar has 12 months in a year, each 30 days in duration. The calendar most of the Churches of Alohym are using today has 29 or 30 days in any given month and has a 13<sup>th</sup> month added seven times in every 19-year cycle!

Evidently, the annual Feast days have been kept on the wrong days! Most of Alohym’s people are not using Alohym’s calendar, but a man-made calendar, which means that they are keeping Alohym’s Feasts on the wrong days. They are also keeping the Sabbath day on the wrong day of the week!

#### ❖ The Original Calendar; Restored and Confirmed!

Referencing back to earlier in this article, numerous sources through historical facts conclude that Saturday which was the 1<sup>st</sup> day of the week on the Roman (Julian) calendar was changed in 321 AD, by Constantine’ as he instituted a new 7 day week making Saturday the 7<sup>th</sup> day of the week. As stated previously on (Saturday) September 23<sup>rd</sup> 2017, the historical and scriptural Revelation 12 sign appeared in the heavens. Did you take notice that Saturday (“the Julian Sabbath”) is when the Revelation 12 sign appeared which occurred on the Day of Atonement, the 10<sup>th</sup> day of the 7<sup>th</sup> Month! (*Note: more on the “Revelation 12 sign” at the beginning of Part 10*)

#### ❖ Revelation 12 & Genesis 1 (Review)

In 2017, God’s original calendar began on (Thursday) March 16<sup>th</sup>, the 1<sup>st</sup> day of Abib and 1<sup>st</sup> Sabbath day of the New Year. That being said; the Equilux day, (*the day of equal day and night*) occurred the day before on March 15<sup>th</sup>. When looking for the structural outline of God’s true calendar you will find it in the Books of Enoch, Jubilee’s, Numbers and Leviticus. The (Aaronic) sacrificial calendar of ancient Israel also outlines the 12 true feast days of God. (*Reference; Chapter 7 in the Book “Living the New Covenant”, in which you can download for free from this website*)

Now starting from March 16<sup>th</sup>, the 1<sup>st</sup> day of the year and counting 192 days forward you end up on Saturday, September 23<sup>rd</sup>, the Day of Atonement. As scripture states; ([Leviticus 23:27-32](#))

## Part 5

### Exposing Error & Exalting Truth

v27; Also on the tenth [day] of this **seventh** month [there shall be] a day of atonement: it shall be an holy convocation unto you; and ye shall afflict your souls, and offer an offering made by fire unto the LORD. v28; And ye shall do no work in that same day: for it [is] a day of atonement, to make an atonement for you before the LORD your God. v29; For whatsoever soul [it be] that shall not be afflicted in that same day, he shall be cut off from among his people. v30; And whatsoever soul [it be] that doeth any work in that same day, the same soul will I destroy from among his people. v31; Ye shall do no manner of work: [it shall be] a statute forever throughout your generations in all your dwellings. v32; It [shall be] unto you a sabbath of rest, and ye shall afflict your souls: in the ninth [day] of the month at <sup>1)</sup> even, from <sup>2)</sup> even unto <sup>3)</sup> even, shall ye celebrate your sabbath.

Since the Revelation 12 sign occurred on Saturday, which would have been the 10<sup>th</sup> day of the 7<sup>th</sup> month, this means that Thursday would have been the weekly Sabbath day. In fact, when using the Gregorian (Julian) calendar the Day of Atonement falls of Saturday every year.

- v1; And there appeared a great wonder in heaven; a woman clothed with the sun, and the moon under her feet, and upon her head a crown of twelve stars:

In verse 1, the constellation Virgo (*the Woman*<sup>G1135</sup>) is clothed with the sun<sup>G2246</sup> ("light") and the moon under her feet. Can you imagine the awe inspiring vision the Apostle John saw 2000 years ago and today the ecclesia according to scripture have lived through this event!

WE must verify the truth and nature of heavenly signs as established in [Genesis 1:14](#).

- v14; And God said, Let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, and for seasons, and for days, and years:

The word "signs", Strong's number H226, the root H225; meaning; "to come" is used many times in scripture but only once in the aleph-bet form of (לארת). The word "signs" translated in this scripture means; "teach or learn Messiah's, covenant". The root of the word "sign" is (את) meaning: "beginning and end" as well as the "leaders mark or covenant". **Question:** who said they were the alpha & omega, which comes from the Hebrew Aleph & Tau (את) Messiah. (Ref: [Rev.1:8](#), [Rev. 1:11](#), [Rev.21:6](#), [Rev.22:13](#))

Now that you understand the root of the word "sign", let's now add the other two letters (ל) Lamedh and (ת) Tau. In Hebrew, letters are associated with numbers and in this instance "signs" (לארת) has the equivalent of (ת) =400, (ת) =400, (א) = 1, (ל) = 30 or 831. If you add the numbers together (8+3+1) it equals 12. It just so happens that the Day of Atonement falls on the 192<sup>nd</sup> day of Alohym's year, (1+9+2)

## Part 5

# Exposing Error & Exalting Truth

which again adds up to 12. [Question](#); do you see this evidence of the truth of how Alohym's perfect cycles of time are?

The end of verse 1 says: "[upon her head a crown of twelve stars](#)", what does the book Genesis say about the stars? ([Genesis 1:16](#)) Keep in mind the translation below is derived from the Hebrew language without punctuation or added words [he made] or [also](#).

- [v16](#); And God made [two great lights](#) the [greater light to rule the day](#) and the [lesser light to and rule the night the stars](#).

Here we read that the lights in the heavens are for signs, seasons, days and years and in verse 16, the Sun rules the day and the stars the night. Let's read what Moses wrote in the Book of [Jubilees' 2:9](#) concerning this subject.

- [v9](#); And Yahuah (the LORD) appointed the sun to be a great sign on the Earth for [days](#) and [for Shabbats](#) and [months](#) and for [feasts](#) and for years and for [Shabbats of years](#) and for [jubilees and for all seasons of the year](#).

In Jubilees', Alohym makes it clear that the Sun is the sign for all Shabbats, months, seasons, days, years and feasts. If you read [Rev. 12:1](#) again it say; "[a woman clothed with the sun](#)", making this prophetic sign in the heavens not only a Sabbath day but the only Sabbath festival day that sits outside of the weekly Sabbaths. In review, both the Books of Genesis and Jubilees make the statement that the sun is for Shabbats, seasons, feast, days and years.

### ✓ In Conclusion:

This special sign in the heavens follows the Biblical model as a true prophetic sign from God. God is a perfect creator and His Sabbaths should have great meaning to every believer who seeks the Fathers will. Keep in mind after reading this article that Gods true [weekly Sabbath day is not on the Saturday](#) (Saturn's day) as instituted in 321 AD by Constantine. As we make covenant with our Father and Messiah in Heaven, [being on His time](#), worshiping and enjoying fellowship with our heavenly family is a vital part of our inheritance for the saints!

Paul states in [Colossians 2:8](#) and [2 Thessalonians 3:6](#).

- [Colossians 2:8](#); Beware lest any man spoil you through philosophy and vain deceit, after the [tradition](#) of men, after the rudiments of the world, and not after Christ.
- [2 Thessalonians 3:6](#); Now we command you, brethren, in the name of our Lord Jesus Christ, that ye withdraw yourselves from every brother that walketh disorderly, and not after the [tradition](#) which he received of us.

Brothers and sisters in Christ (Yahusha) who died for our transgressions, be of good cheer for our Heavenly Father has set forth the signs and path in order that we may see and understand the good news of His gospel. Be Berean; search out your hearts in understanding while there is still time to do so.

## Part 5

### Exposing Error & Exalting Truth

As scripture says in [Romans 3:3-4](#)

- [v3](#); For what if some did not believe? shall their unbelief make the faith of God without effect? [v4](#); God forbid: yea, let God be true, but **every man a liar**; as it is written, That thou mightest be justified in thy sayings, and mightest overcome when thou art judged.

To the Lost Sheep scattered abroad, keep in mind that Alohym's true Sabbath calendar has NO elements of man's calculations or religious doctrine. Bear in mind that God's true Sabbath day of worship is Thursdays and begins a sunrise and ends on sunrise the next morning. Do NOT let the traditions of men and religious views of the many take your crown.

#### ➤ Now given a choice!

Have you ever heard the saying; "[what you don't know will hurt you](#)"? Well if you said yes, what we don't know can be the difference between life and death. Our Father in Heaven as scripture states is gathering His disciples and bringing them into Son ship, those who make the effort to step into relationship and out of this world. Scripture also states that the Holy Spirit will lead you into all truth and teach you things to come; here is one of those truths to absorb.

[John 16:13](#), Howbeit when he, the Spirit of truth, is come, he will guide you into **all truth**: for he shall not speak of himself; but whatsoever he shall hear, [that] shall he speak: and **he will shew you things to come**.

Have you ever really thought about time itself? Being human, we take time for granted but to make matters worse we were handed down a "[lie](#)" without knowledge to question! Today ecclesia, the veil is lifted and through truth you can now make a sound choice.

Messiah said this in [Matthew 11:30](#), "For my [yoke easy](#), and [my burden](#) is light". Now did you get that, His burden is light meaning; Alohym's commandments give more blessings and are less burdensome then obeying the doctrine and traditions of men which keep you enslaved. Also, read [Matthew 10:33-42](#), as Messiah came not to make peace but bring a sword. As believers we were not given a spirit of fear but of power, love and a sound mind so don't be fearful of the truth.
